TITLE 1993-94 Wisconsin Statewide School Performance Report.
INSTITUTION Wisconsin State Dept. of Public Instruction, Madison.
PUB DATE 95
NOTE 883p.
AVAILABLE FROM Publication Sales, Wisconsin Dept. of Public Instruction, Drawer 179, Milwaukee, WI 53293-0179 (Bulletin No. 96138).
PUB TYPE Statistical Data (110) -- Reports - Evaluative/Feasibility (142)

EDRS PRICE MF06/PC36 Plus Postage.
DESCRIPTORS *Academic Achievement; Attendance Patterns; *Educational Assessment; Educational Finance; Elementary Secondary Education; Enrollment; *Evaluation Criteria; Expenditures; Graduation; Income; *Performance; School Districts; School Personnel; Standardized Tests; *State Norms; *Student Evaluation; Suspension
IDENTIFIERS *Wisconsin

ABSTRACT

This document presents data on Wisconsin school performance for 1993-94. Data were derived from the Wisconsin Department of Public Instruction (DPI), private firms that administer assessments, and Wisconsin's 427 public school districts and the state schools for the deaf and visually handicapped. The report includes introductory material, explanatory text, information tables, and a glossary. Text and tables are divided into two major sections to mirror the emphasis the DPI has placed on accountability--student performance indicators and opportunity-to-learn indicators. Student-performance indicators are based on eight different measures of student achievement. The section on opportunity-to-learn indicators includes profiles of districts, schools, and students. District-profile information includes district staffing ratios, high school graduation requirements, general fund revenues, and general fund expenditures. Student-profile information is comprised of data on enrollment, attendance, out-of-school suspensions, expulsions, retentions, habitual truancy, dropouts, school-sponsored community activities, and extra-co-curricular activities. Information is also provided about the state's two residential facilities, other special-needs schools, and a few charter schools. Appendices contain student-performance indicators, opportunity-to-learn indicators, finance tables, and a glossary. (LMI)

Acknowledgements

As they always have been, Wisconsin's school districts are the impetus toward excellence of the School Performance Report (SPR). School boards, administrators, and staff are as interested in accountability as anyone. They are on the front lines, and they want to make a difference.

The assistance of members of the Department of Public Instruction staff, again, has been invaluable. As the agency has realigned and been downsized, two individuals put in extra effort to make sure that the right information from the correct sources found its way to the appropriate location in a timely manner. Without Chris Selk and Jeff Jonietz, this project could not have taken the giant leap forward that it did this year.

The collection of information from all 427 school districts in Wisconsin— and the synthesis of that information into a meaningful report— is no small task. The work was ably handled by the Office Technology Center (OTC): Vicky Weasler, Kathy Addie, Hazel Fedro, Dianne Penman, and Cindy Sellnow. One member of the OTC staff, Lynn Kruchten, turned the columns of figures and countless pages of text into a readable and useful document. Additionally, Barb Ballweg, of the Bureau for Information Management, served as a jack-of-all-trades in many areas.

Statistics, data, and numbers need explanations and summaries to become information. Again this year, that work was provided by Richard Russell of the Bureau for Information Management and Elizabeth Ford of the Office of Educational Statistics.

The School Performance Report is now in the Office of Educational Accountability. Staff hasn't moved and neither the collection nor the book look much different, but this realignment is significant. Guiding the project through the transition were Steve Dold, Darwin Kaufman, Patrick Sweeney, Pauli Nikolay, and Susan Grady.

Along with the change in emphasis from data collection to the use of information for purposes of accountability, analysis of the SPR collection and other sources of data has become key. It is our hope to not only measure educational effectiveness but construct a model that school districts and communities can use to **be the best they can be for their students**. Jean Whitcomb has been instrumental in this new and important step.

And finally, where would the School Performance Report be without its heart and soul, Steve Sopcak and Linda Zach. Both have taken on additional duties and responsibilities in many other areas without letting their commitment to and appreciation of this project falter or lag. Their efforts were invaluable.

Thomas S. Beebe, Coordinator
1993-94 School Performance Report

Introduction

Every edition of the statewide School Performance Report (SPR) is a milestone. The 1993-94 version is no exception. With the growing importance of accountability, this report becomes a wealth of information for those working to improve student performance and achievement and the ability of schools and districts to better serve students.

Those interested in education should be pleased with this edition of the School Performance Report:

- The Department of Public Instruction (DPI), in conjunction with other state agencies and school districts from one end of the state to the other, continues to sift and winnow the information that is critical to measuring the success of Wisconsin's educational system.
- The use of this information, not only to measure educational success but help define achievement and performance, has become a priority within the department.

The evolution of the School Performance Report will continue. It now has a purpose other than the collection of statistics and data for the sake of collecting statistics and data. As the shareholders of the educational system attempt to construct a model of success, this document will do its part to supply the necessary information:

- DPI staffers, school district personnel, and those interested in children and their education will continue to search for those indicators that assist the modeling of educational success.
- SPR staff will continue to refine the SPR collection process so the appropriate information gets to the right people in a timely manner.

How the report works

This report gleans information about students, schools, and school districts from three sources:

- The DPI
- Private firms that administer assessments
- Wisconsin's 427 public school districts and the state schools for the deaf and visually handicapped

Collection of information from DPI and assessment sources has been relatively streamlined. Statistics and data are collected throughout the year and, in addition to other uses, directed to the staff of the SPR.

Despite a rocky beginning for the 1991-92 school year, the third phase of the project has become more accurate, user-friendly, and effective. To keep districts in compliance with the SPR legislation, collection diskettes are mailed in the spring of each school year and returned to DPI in the early fall. The information is aggregated and compiled with the other collections and returned to districts in the late fall/early winter to allow publication of local performance reports by January 1.

What's in this document?

The 1993-94 statewide School Performance Report summary appears much as it has from the beginning. It includes introductory material, explanatory text, information tables, and a glossary. Text and tables are divided into two major sections to mirror the emphasis the DPI has placed on accountability: Student Performance Indicators and Opportunity-to-Learn Indicators.

Student Performance Indicators give readers a look at eight different measures of student achievement:

- Third Grade Reading Test
- Eighth Grade Knowledge and Concepts Examinations
- 10th Grade Knowledge and Concepts Examinations
- Enhanced American College Test (ACT)
- Advanced Placement Test
- Graduation information
- Postgraduation Follow-up data

Opportunity-to-Learn Indicators offer insight into the classes and experiences made available to students. It is divided into profiles of districts and schools and of students. District Profile information includes:

- District Staffing Ratios
- High School Graduation Requirements
- General Fund Revenues
- General Fund Expenditures

The Student Profile information, which is the bulk of the information collected directly from the districts, is made up of text and tables on:

- Enrollment
- Attendance
- Out-of-School Suspensions
- Expulsions
- Retentions
- Habitual Truancy
- Dropouts
- School-Sponsored Community Activities
- Extra/Co-curricular Activities

Also included in the 1993-94 School Performance Report is information about Wisconsin's two residential facilities (the schools for the deaf and the visually handicapped), other special needs schools, and the state's handful of charter schools.

Third Grade Reading Test

District	Third-Grade Reading Test					
	Enrolled at Test Time	Students Tested	% Students Tested	% Below Performance Standard	% Inconclusive	% Above Performance Standard
State Totals or Averages	**65,164**	**59,182**	**90.8**	**4.7**	**5.8**	**89.5**

The *Third Grade Reading Test (TGRT)* allows districts to evaluate their primary school reading programs in comparison to a statewide performance standard. It also helps identify marginal readers who may need remediation.

Wisconsin's 1994 performance standard is based on the standard set in 1989, the first year of the *TGRT*. It was designed by a panel of 24 third-grade teachers and reading specialists. Scores are reported as above or below the performance standard or inconclusive, which includes those scores that aren't clearly above or below the standard.

MetriTech Inc., of Champaign, Ill., developed the 1994 *TGRT* under the direction of the Department of Public Instruction and the *TGRT* Advisory Committee. It was administered in three sessions over two days and consisted of three reading passages, two narrative stories of about 1,000 words each, and an expository report of about 600 words. In addition to 40 comprehension questions, students were asked a number of questions that measured reading strategies, prior knowledge, and reading attitudes. There were 89 questions on the test, although only scores on the 40 comprehension questions were used to establish the performance standard. Results from the other questions are used locally to interpret the comprehension scores.

The 1993-94 test was administered to all public school third graders except those absent during the testing period (March 14 to April 1) or excused by local officials due to exceptional educational needs (EEN) or limited English proficiency (LEP).

Results are expressed as percentages of students who scored above the performance standard (scores from 29 through 40 questions correct), inconclusive (23 through 28), or below the performance standard (0 through 22).

In Wisconsin, 1,144 schools in 416 districts had 65,164 students enrolled in third grade during the time the TGRT was administered. Of that number, 59,182 (90.8 percent) took the assessment. About 8 percent of the students were excluded for EEN or LEP reasons, and about 1 percent were absent. Statewide, 6,562 third graders were identified as EEN, and 34.9 percent of that number took the test.

Forty-six districts and 218 schools tested all of their third graders. Only three districts tested fewer than 80 percent. Eighty-nine schools, however, did test fewer than 80 percent of their students.

The highest possible score of 40 correct answers was achieved by 14,563 students in 50 districts and 183 schools. In 115 districts, no pupils scored below the performance standard. About 89 percent of those tested scored above the performance standard. Six districts and 55 schools had fewer than 70 percent of their students scoring above the performance standard.

BEST COPY AVAILABLE

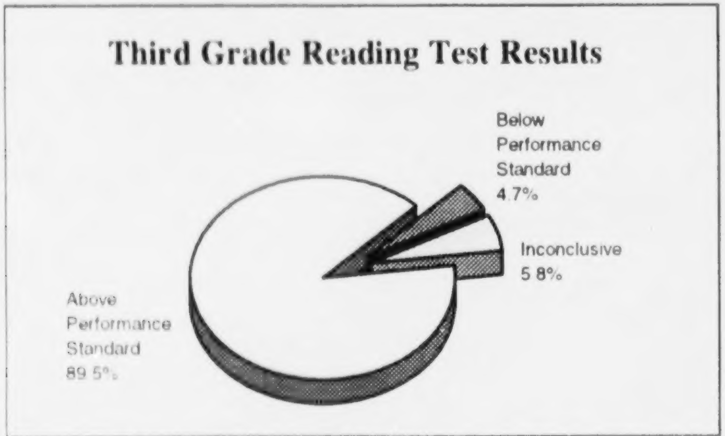

Figure 1: Third Grade Reading Test

An average of 4.7 percent of the students tested scored below the performance standard. Three districts had more than 20 percent of the tested students scoring below the performance standard. Another 28 districts fell between 10 and 20 percent.

Of those students tested, 6,244 were referred for evaluation of possible reading problems. Additionally, 69 districts had at least one school where fewer than 80 percent of tested third graders scored above the performance standard.

Inconclusive results were recorded for 5.8 percent of the students. Sixty-four districts and 252 schools had no one in this area, but two districts had more than 20 percent in the inconclusive category. Fifty-one districts had between 10 and 20 percent of their third graders in this range.

Statewide, third graders had an average score of 35.7 correct of the 40 reading comprehension questions (89.3 percent).

Analyzed by gender, the 29,469 males tested had an average score of 88.7 percent correct, and the 29,506 females had 90.1 percent of the questions correct. An ethnic breakdown of the average number of correct questions had whites at 90.6 percent, Asians at 86.3, Hispanics at 85.7, American Indians at 84.2, and African American third grade students at 79.3 percent correct.

Except for the nine largest districts (those with enrollments of 10,000 or more), test results analyzed by district size showed few difference. The largest districts had 85 percent of their students scoring above the performance standard. Between 90 and 92 percent of the students scored above the standard in the next three levels of district size—4,000 to 9,999, 1,000 to 3,999, and 999 or fewer.

The number of pupils in a school district receiving Aid to Families with Dependent Children (AFDC) did affect achievement on the TGRT. The average score in districts where 10 percent or more of the children received AFDC was 8.6 percentage points lower than in districts where fewer than 5 percent of the students received AFDC.

Knowledge and Concepts Examinations

The Wisconsin Student Assessment System (WSAS) is based on the first three state learner goals for the children of the state. They declare that a learner in Wisconsin will:

- Build a substantial knowledge base.
- Develop thinking and communication processes.
- Apply knowledge and processes.

To meet the initial goal, eighth- and 10th-grade tests were administered as part of the WSAS and were first given on a voluntary basis during the 1992-93 school year. The assessment vendor changed following that year, and currently the *Eighth and Tenth Grade Knowledge and Concepts Examinations* are administered by The Psychological Corp., of San Antonio, Texas. Academic portions of the tests are in reading, language, mathematics, science, and social studies using multiple-choice and short-answer questions (except for language). Students also respond with two essays to writing prompts. A career interest inventory completes the test.

The examinations are given in the fall of the year, and the results are used to "identify those school districts that are low in performance (s. 115.38[4])." The state superintendent of public instruction is then required to work with the districts identified to help them improve performance.

Districts in need of improvement are identified by Average Grand Composite Score (AGCS). The AGCS is based only on test results from students who took all of the academic tests. Scores for EEN, Section 504, and LES students are excluded. It was designed by the DPI to provide an overall indication of student achievement and is derived as follows:

- Each of the five multiple-choice tests has 30 questions worth one point each toward the GCS (Grand Composite Score), a maximum of 150 points.
- Each essay is worth up to 12 points, and each point earned is worth one point toward the GCS for a maximum of 24 points.
- Each of the four short-answer tests has three questions (a total of 12 questions). A student can earn a score of 0 through 3 on each question. For purposes of the GCS, the score on each question is weighted by two for a maximum of six points on any question for a maximum of 72 points.

The GCS points earned as described above are summed, so the maximum possible GCS is 246 (150 + 24 + 72).

Although the GCS is provided for all students who took all parts of the academic tests, the AGCS contained in this report is the average GCS without scores of EEN, Section 504, and LES students. All subtest scores are reported for all students taking each of the subtests.

Eighth Grade Knowledge and Concepts Examinations

8th Grade Knowledge and Concepts Examinations - State Totals or Averages

Enrolled at Test Time	AGCS	Multiple Choice						Writing Test		Short Answer			
		Reading	Math	Language	Science	Social Studies	Battery Total	Expressive	Persuasive	Reading	Math	Science	Social Studies
64,963	155	66	71	60	69	67	73	58	37	6.3	5.8	4.6	3.8

Five hundred and twenty schools in 416 districts (only districts with eighth graders) took the knowledge and concepts examinations. Seven had an AGCS of 180 or above. The statewide average AGCS was 155.

Using this examination, 21 districts had eighth grades low in performance based on an AGCS below 140 points.

The first portion of the assessment consists of multiple-choice questions in reading, mathematics, language, science, and social science. Each section is scored separately, and a multiple-choice battery total is calculated for students who took all five multiple-choice tests. The battery total for all Wisconsin schools was in the 73rd percentile with the highest scoring district achieving a score of 95, and the lowest scoring district achieving a score of 31.

For the reading portion of the test, the highest score was 90, and the lowest score was 24. Statewide, scores averaged in the 66th percentile.

On the mathematics portion of the multiple-choice test, the highest score was in the 96th percentile, and the lowest score was in the 31st percentile. The statewide average was in the 71st percentile.

The highest score in language was in the 90th percentile, while the lowest was in the 20th percentile. The Wisconsin average was in the 60th percentile.

The next portion of the multiple-choice test was in science. A 93rd percentile was the highest score, and 36th percentile was the lowest score. The statewide average was in the 69th percentile.

Social science was the final portion of the multiple-choice section. Test scores averaged in the 67th percentile across Wisconsin, with the highest at 89 and the lowest at 32.

The writing portion of the *Eighth Grade Knowledge and Concepts Examinations* was also reported by national percentile ranks. Expressive writing scores averaged in the 58th percentile, with high at the 90th percentile and low at 18th.

On the persuasive writing portion of the test, Wisconsin students averaged in the 37th percentile. Despite that, the highest score was in the 98th percentile. The bottom score, however, was in the fourth percentile.

Mean raw scores were used for the short-answer tests. The average top reading score was 7.8 out of nine questions correct. The average low score was 5.2. The state average was 6.3 points.

The best average score in mathematics was 8.1, and the lowest average score was 3.9. The statewide average was 5.8.

Science scores averaged 4.6 across Wisconsin. The highest average score was 6.3, and the lowest was 2.7.

The average score on the final portion of the short-answer tests, social science, was 3.8 out of nine. The highest average score was 6.1, while the lowest score was 2.6.

Tenth Grade Knowledge and Concepts Examinations

10th Grade Knowledge and Concepts Examinations - State Totals or Averages

Enrolled at Test Time	AGCS	Multiple Choice						Writing Test		Short Answer			
		Reading	Math	Language	Science	Social Studies	Battery Total	Expressive	Persuasive	Reading	Math	Science	Social Studies
63,256	154	69	71	58	67	64	73	50	50	5.9	4.5	4.5	4.3

Tenth Grade Knowledge and Concepts Examinations were given to students in 426 schools in 379 districts (those with 10th grades). Six districts averaged above 175 AGCS. The statewide average AGCS was 154.

Using this examination, 26 districts had 10th grades low in performance based on an AGCS below 139 points.

The highest national percentile rank achieved by any district was 91 for the battery total of the multiple-choice questions. State students averaged in the 73rd percentile. An average score of 27 was the lowest score achieved by a district.

The average reading test score (multiple-choice) in Wisconsin was in the 69th percentile. The highest district was in the 88th, and the lowest district was in the 29th percentile nationally.

Mathematics scores averaged in the 71st percentile. The highest district was 89, while the lowest district was at 22.

The highest language score was in the 88th percentile. The lowest score was in the 16th. The statewide average score was in the 58th percentile.

Scores on the science portion of the multiple-choice test averaged in the 67th percentile. The high score of 92 and the low score of 36 were recorded.

The final portion of the multiple-choice test dealt with social science. The Wisconsin average was 64. The highest district scored at the 85th percentile and the lowest at 30.

In writing, the scores on the expressive writing portion of the examinations statewide averaged in the 50th percentile. The high score of 80 and the low score of 9 were reported.

Scores averaging in the 82nd percentile topped the list of state schools on the persuasive writing test. A score of 8th percentile was at the bottom. The state average was 50.

Wisconsin students answered an average 5.9 of 9 questions correctly on the reading portion of the short-answer test. Scores of 7.3 and 4.7 were the extreme scores.

Correct mathematics scores averaged 4.5 across the state. The highest districts averaged at 6.3 while the lowest averaged 1.9.

Science scores also averaged 4.5. The top score was 5.8 and the bottom score was 2.3.

On the final portion of the short-answer test, social science, the state average number of correct answers was 4.3. The top district averaged 6.3 while the lowest averaged 2.

Enhanced American College Test

ACT - Class of 1994

Students Tested	% Students Tested*	Average Student Score				
		English	Math	Reading	Science	Composite
29,991	55.93	21.1	21.3	22.2	22.2	21.8

The Enhanced American College Test (ACT) is an entrance requirement for the University of Wisconsin System as well as many other state colleges and universities. It is administered and scored by the American College Testing Company, of Iowa City, Iowa.

Students may take the test as juniors or seniors, but only scores earned by members of the class of 1994 are reported (although they may have been earned as juniors or seniors). Students can take the test more than once, but only the most recent completed tests are counted.

ACT is a test designed to assess accumulated knowledge during the K-12 educational experience. It has four parts: English, mathematics, reading, and science reasoning. A composite score, which is the weighted average of the scores from the subject-area tests, is also given. Each portion of the test has a maximum score of 36.

The average student score is the sum of the scores for students in a school or district in the four tested areas divided by the number of students who took the test. The percent of students tested is the number of students tested divided by the third Friday enrollment of the 12th grade.

Every Wisconsin district that operates a high school—380 operating 421 high schools—had students who took the ACT. Statewide 29,991 pupils, or 55.93 percent of the 12th graders enrolled, were tested. Kohler had the highest percent of students taking the test, 96.43 percent, while a low of 13.79 percent was recorded at Reuther High School in Kenosha.

Three schools scored 24.7, the top average composite ACT score: Madison West, Madison Memorial, and Whitefish Bay. There was also a trio at the bottom, scoring 16.0: Norris, Milwaukee South Division, and Milwaukee North Division. The state average was 21.8, and the national average was 20.8.

The same six schools held the same places on the mathematics portion of the ACT. West, Memorial, and Whitefish Bay scored 25.0, while North Division, South Division, and Norris averaged 15. The state average score on this portion of the test was 21.3, and the national average was 20.2.

The Wisconsin average score on the English component of the ACT test was 21.1, and the national average was 20.3. The range was from a high of 23.8 at Whitefish Bay to a low of 12.0 at Norris.

State students scored an average of 22.2 on the reading part of the test. The national average was 21.2. Phelps had 26.8 and Norris had 14.8.

The high average science score, 24.9, belonged to students at Madison Memorial, and the low, 14.0, went to Norris. Wisconsin pupils averaged 22.2, and the national average was 20.9.

Analysis indicates that those students who took a rigorous college preparatory or core curriculum scored better on the ACT. The core curriculum includes four or more years of English and three or more years of mathematics, science, and social studies.

Students taking core curriculum subjects had a composite score of 22.9 compared with a score of 20.6 for students who had not taken the recommended college-preparatory courses.

The proportion of African American students taking core curriculum subjects was 42.7 percent for 1994, up from 42.5 percent last year. The proportion of Mexican American students taking core subjects was 43.1 percent, up from 37.0 percent in 1993.

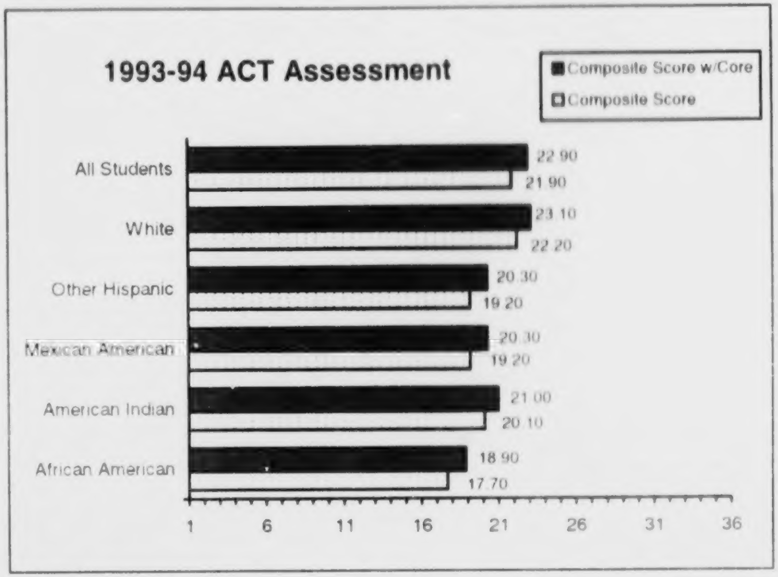

Figure 2: ACT Assessment

Generally, minority student scores for Wisconsin outpaced their national counterparts. This did not hold true, however, for two categories. Students who identified themselves as being Asian (22.1 and 22.5) or Other Hispanic (20.3 and 20.5) had scores lower than the national group.

Males tended to have higher scores than females for all subtests and the composite, both in Wisconsin and the nation. Wisconsin's 15,480 males taking the ACT had a composite score of 22.2, compared to 21.6 for the 18,609 females taking the examination.

Advanced Placement Test

District	Advanced Placement Test (9th-12th)			
	No. of Students Taking Exams	No. of Exams Taken	No. of Exams Passed	% Exams Passed
State Totals or Averages	**5,890**	**8,076**	**5,317**	**65.84**

Advanced Placement (AP) Tests allow high school students to write examinations for college credit. All of the University of Wisconsin system institutions and many other colleges and universities around the country award credits for AP test completion. The program is administered by The College Board, of Princeton, New Jersey.

College Board offered 29 AP examinations in 16 fields. Each test is about three hours long. Students who earn a 3, 4, or 5 on the exam are considered to have passed by The College Board.

The program is administered by the school district. The College Board does not require a formal AP class prior to the testing of students, but schools may choose to offer formal preparation for the examinations in a variety of ways, including advanced coursework, a formal AP course, tutorial opportunities, distance learning, or joint ventures with other schools and/or districts.

Students may take exams in more than one subject. In this report, the percent of exams passed is the number of exams passed divided by the number of exams taken.

Fifty-seven percent, or 216, of the districts operating high schools (249 schools) in Wisconsin offered AP Test opportunities. Only 3.19 percent of the enrollment in grades 9-12—5,890 students—were tested. New Berlin Eisenhower High School had the highest percentage of its enrollment taking AP tests (16.86 percent). Madison Memorial, Arrowhead, and Stevens Point Area Senior high schools exceeded 10 percent. Nineteen schools had a single exam-taker.

The most AP tests, 332, were administered at Madison Memorial High School. Stevens Point Area Senior High School gave 329 tests. These two schools also led the list of number of exams passed, 282 and 221 respectively. Nicolet had over 200 exams passed.

Students at Beloit Memorial High School took an average of 2.4 AP exams each, while two exams per pupil were averaged by high school students at Marion, Nicolet, and Hamilton. Another 97 schools averaged one exam per student.

Twenty-two schools, none of which administered more than six tests, achieved a 100 percent passing rate on AP exams taken. Among schools that gave more than 50 tests, Shorewood High School (95.77 percent passing exams) and Elmbrook Central (92.50 percent) topped the list. Hartford, Nicolet, and Homestead were near the top.

Graduation

District		Graduation	
		(12th Grade) - State Totals or Averages	
	3rd Friday Enrollment (12th)	No. of Graduates	Graduation Rate
State Totals or Averages	**53,625**	**48,371**	**90.20**

Wisconsin students graduate when they complete the course of study established by their local school district. A school board may also decide to issue a diploma to those students who successfully complete the school-sponsored general education development program (GED) or attain a high school equivalency diploma (HSED). If a diploma is issued for either the GED or HSED, the recipient is considered a graduate in this report.

The number of graduates in the spring of the school year divided by the number of 12th graders enrolled on the third Friday in September of the same school year (and expressed as a percentage) is the graduation rate. Because the denominator of this calculation is the third Friday enrollment, which could realistically vary from that point in time, the graduation rate may be skewed and could, in some cases, be greater than 100 percent.

Furthermore, no adjustment is made in the third Friday enrollment count, and students who leave a specific school for any non-dropout reason are not taken into account. Therefore, readers are cautioned not to over interpret this information by equating a low graduation rate with a high dropout rate.

On the third Friday in September of the 1993-94 school year, 53,625 students were enrolled in the 12th grade. In the spring of that same school year (including summer school), 48,371 of those seniors had graduated, yielding a graduation rate of 90.20 percent.

Graduates were reported by 447 schools in Wisconsin. This number represents schools in 380 districts and the state's two residential schools for the deaf and visually handicapped. Remember, 47 districts have K-8 grades only.

The largest number of graduates was reported in Milwaukee Public Schools (MPS), the state's largest district. MPS graduated 3,066 students (88.61 percent).

Other districts reporting over 500 graduates (with the graduation rate in parentheses) for the 1993-94 school year were: Madison 1,316 (90.44 percent); Green Bay 1,120 (87.57); Racine 1,019 (88.92); Waukesha 883 (93.44); Appleton 782 (91.78); Kenosha 760 (86.76); Eau Claire 692 (99.57); Janesville 659 (94.96); Sheboygan 604 (95.12); Wausau 599 (88.87); Stevens Point 524 (76.95); and West Allis 513 (93.6 percent).

The Norris residential facility had the fewest number of graduates, two, followed by the Phelps School District, five, and the Washington School District, seven.

There are 27 individual schools in Wisconsin that graduated over 300 students in the spring of 1994. The largest was Stevens Point Area Senior High School with 524 graduates and a graduation rate of 76.95 percent.

Other schools, their number of graduates, and graduation rates are: Fond du Lac Goodrich 467 (86.32 percent); Appleton West 437 (91.23); Wisconsin Rapids Lincoln 411 (88.77); Kenosha Tremper 406 (86.02); Madison West 390 (102.90); Waukesha South 388 (94.17); Arrowhead 384 (97.22); Racine Park 372 (90.29); Neenah 367 (91.75); Superior 386 (83.56); Manitowoc Lincoln 356 (91.05); Eau Claire North 350 (112.54); Wausau West 349 (91.36); Appleton East 345 (92.49); Eau Claire Memorial 342 (89.06); Mukwonago 337 (91.83); Madison Memorial 336 (98.53); D.C. Everest 336 (88.65); Janesville Craig 334 (94.62); Waukesha North 332 (90.46); Janesville Parker 325 (95.31); Green Bay Southwest 317 (89.04); Madison East 315 (113.72); Sheboygan North 307 (95.34); Racine Horlick 306 (91.34); and Kenosha Bradford 302 (88.30 percent).

Eighteen schools that reported seniors in the fall of 1993 reported no graduates in the spring of 1994. In virtually all cases, these facilities deal with children with special needs or circumstances, and in most cases graduation is not an appropriate term.

Eleven districts and 16 schools reported graduation rates above 100 percent, and 30 districts and 34 schools reported exactly 100 percent. At the other end, the lowest rates were reported by Norris (40 percent), Phelps (71.43 percent of seven seniors) and the Wisconsin School for the Visually Handicapped (72.22 percent). Among schools of more substantial enrollment and non-special circumstances, the lowest graduation rates were reported by Milton (72.73 percent) and Menomonee Falls (75.62 percent).

Postgraduate Follow-Up

Postgraduation Follow-up (12th Grade) - State Totals or Averages

Job Training %	Voc/Tech College %	4-Year Col/Uni %	Military %	Employment %	Seeking Employment %	Misc.** %
1.7	**22.7**	**48.0**	**3.2**	**8.1**	**4.5**	**11.8**

Although the Department of Public Instruction doesn't conduct an actual follow-up of graduates, it does solicit their intentions during their senior year in high school.

Students answered surveys prior to the end of the school year indicating their plans after graduation. Choices included a job training program, vocational or technical college, four-year college or university, enlistment in the military, employment, seeking employment, other, and undecided. For purposes of this report, other, undecided, and those who didn't return the form are lumped under the heading of miscellaneous.

Care should be used in analyzing these numbers. Those students who selected other or undecided, or those who didn't return the survey, may actually seek out one of the choices following graduation. Also, graduates may change their mind often between the time they filled out the survey and decided on a postgraduate course to follow. Finally, there is no guarantee that students completing the survey did so accurately, carefully, or seriously.

The SPR table shows the percentage of 12th graders enrolled on the third Friday in September of the 1993-94 school year who selected one of the postgraduation intention options listed.

The same 382 districts (including the schools for the visually handicapped and deaf) and 429 schools that reported graduates reported postgraduation intentions. The most popular selection, picked by 48 percent of Wisconsin's 53,625 high school seniors was four-year college or university (48.2 percent last year). Those selecting vocational/technical college were 22.7 percent (22.8 last year). The remainder of the choices were employment, 8.1 percent (9.0 last year); seeking employment, 4.5 percent (4.9 last year); military, 3.2 percent (3.6 last year); and job training, 1.7 percent (2.3). The miscellaneous category (other, undecided, and non-returned surveys) accounted for 11.8 percent of the enrolled seniors.

Although almost one-half of all seniors enrolled for the 1993-94 school year (48 percent) indicated they would attend college following graduation, the range was great. In Phelps, Whitefish Bay, Mequon-Thiensville, Nicolet, Shorewood, and Kohler, more than 75 percent of the senior classes selected four-year college or university as their postgraduation intention. On the other hand, only 13.6 percent of the 12th graders in Randolph, 15.4 percent of those in Menominee Indian, and 16.7 percent of those in Beloit selected this intention. The districts that show zero in this column are considered anomalous.

The second largest category (22.7 percent) was the vocational/technical college intention. Seniors in the Menomonie Area and Altoona districts, both over 70 percent, led the way. It should be pointed out, however, that neither district reported any students intending to pursue a college/university education, indicating that perhaps all those indicating any sort of postsecondary education were lumped under this selection. The highest rates that don't appear to be anomalies are in Crandon (55.6 percent) and Luxemburg-Casco (50.7 percent). Five districts and nine schools reported zero for this option.

Statewide, 8.1 percent of the senior class of 1994 said they already had jobs lined up following high school. Weston and Norris topped the list at 50 percent, while another 22 districts fell between 25 and 50 percent. Fifty-two districts and 59 schools reported nobody in this category.

Another 4.5 percent of the 12th graders statewide will be looking for work. The Wisconsin School for the Visually Handicapped (46.2 percent) and Gilman (40.0 percent) had the largest contingent in this group. Reporting zeros here were 135 districts and 147 schools.

Military was the choice of 3.2 percent of the seniors in Wisconsin. It was, however, considerably more popular in Pepin, Kohler, Pembine, and Siren, where more than 16 percent of the 12th graders selected this option. Conversely, 65 districts and 73 schools reported no response in this category.

Statewide, 1.7 percent of the enrolled 12th graders anticipated graduating and joining a job-training program. Only two districts, Oconto and Juda, had greater than a 20 percent response to this selection. Two hundred and forty districts and 258 schools had no students picking this postgraduation option.

Statewide, 11.8 percent of seniors enrolled on the third Friday in September are reported under miscellaneous, which means they selected either other or undecided or they did not return the survey. Janesville and New Richmond, with 100 percent, are considered anomalies. Ashland (58.5 percent), Holmen (45.9 percent), and Howard-Suamico (42.7 percent) are also curious because of the size of the miscellaneous group.

Opportunity-to-Learn Indicators

At the same time we measure student performance, we can also measure the performance of the school and school district. The impact occurs in many forms, which to a greater or lesser degree help determine what and how much a student learns. The School Performance Report calls the measures of this impact Opportunity-to-Learn Indicators.

- Advanced Coursework—Students in Wisconsin have the opportunity while still in high school to take a wide variety of courses that will broaden and augment the basic K-12 curriculum. The skills, knowledge, and problem-solving ability they gain from these classes will serve them well no matter what course they pursue following graduation from high school.
- Student Profile—Much of the information collected for the School Performance Report provides a snapshot of young people and the education they receive. Remember, this is only part of the overall picture. This information should not be used in isolation, because it will give an incomplete and distorted pictured of the educational experience.
- District Profile—Just as some information gives a point-in-time look at Wisconsin students, other data offers a snapshot of schools and school districts. Although only part of the pictured the District Profile is still an accurate look at the fiscal effort and human resources involved in education.

Wisconsin schools have a deep commitment to the state educational goals, with particular emphasis on the first three learner goals. The educational process strives to build a substantial knowledge base, develop thinking and communications skills, and teach students how to apply that knowledge and processes.

Educators, parents, and the public should be aware, however, that schools don't pursue these goals in a vacuum. What goes on in the school as an institution has a great impact on a pupil's ability to learn. For that reason, the School Performance Report has just as carefully developed this section on Opportunity-to-Learn Indicators as it did the chapter on Performance Indicators.

Opportunity-to-Learn Indicators, Advanced Coursework

District	3rd Friday Enrollment (9th-12th)	Advanced Coursework (9th - 12th Grade)														
		Number of Advanced Courses Offered			Mathematics (% Enrollment)			Science (% Enrollment)			Foreign Language (% Enrollment)			Other (% Enrollment)		Combined Rate %
		AP	CAPP	DPI	AP	CAPP	DPI	AP	CAPP	DPI	AP	CAPP	DPI	AP	CAPP	
State Totals or Averages	248,070	634	184	5,819	0.94	0.56	7.04	1.19	0.14	10.63	0.24	0.08	46.57	3.45	1.17	74.01

Wisconsin students have the opportunity to take advantage of a wide range of advanced coursework. Those covered in this report are Advanced Placement (AP) and College Advanced Placement Program (CAPP) courses.

The AP program is offered by The College Board, of Princeton, New Jersey, and the CAPP courses organized and administered as a partnership between high schools and colleges and universities. College credit can be earned through both programs.

Some courses offered to Wisconsin students have also been designated as advanced by the Department of Public Instruction. Courses in this category were selected by the committee that drafted the initial School Performance Report, in conjunction with the Council of Chief State School Officers Math and Science Indicators Project. While both AP and CAPP coursework covers a wide variety of offerings, DPI-defined advanced courses are only offered in mathematics and science.

Also reported in the School Performance Report Advanced Coursework section are all foreign language offerings. Although not all foreign languages are advanced, schools in Wisconsin have a wide variety of offerings that should be recognized.

All school districts submit the PI-1215, Curriculum Report. It includes coursework listed by name and by number, both of which are standard throughout all districts. Information from this section of the School Performance Report comes from the PI-1215.

(Note: Because of the method of reporting curriculum on PI-1215, it is possible to have enrollment in these courses without indicating on the form that you actually have the course. This problem is being addressed. It may, however, cause some districts to be improperly identified in this document as having no advanced coursework.)

Advanced mathematics

124-130	Technical Mathematics
124-330	Calculus and Analytic Geometry
124-700	Statistics/Probability
124-800	Trigonometry

200-004	AP Spanish
205-001	CAPP Foreign Language

Figure 5: Foreign Language Courses

The data tables of this document display several facets of advanced coursework. In addition to the number of advanced courses offered in each area, the percentage of a given district's grades 9-12 enrollment who are taking an advanced course in either mathematics, science, foreign language, or other (see above) is shown. The percentage is calculated by dividing the number of students in a given set of courses by the third Friday in September enrollment.

A final column is the combined rate of the school's grades 9-12 enrollment taking advanced coursework. This percentage may be larger than 100 percent because it is calculated by combining the rates in the preceding four columns.

As mentioned, third Friday in September enrollment is used as the denominator in the calculation of these percentages. This enrollment for grades 9-12 in a given school is displayed next to the district name in the table.

Wisconsin has 427 "regular" school districts and the state schools for the Visually Handicapped and the Deaf. Although listed in the tables—and although they could offer advanced courses—the two state schools are not included in this analysis. Neither are the state's 47 elementary-only districts or the Norris school, which is a residential facility (and could also offer advanced courses).

Statewide, 634 Advanced Placement (AP) and 184 College Advanced Placement Program (CAPP) courses were offered. Wausau offered by far the most AP courses with 29, followed by Sheboygan Falls with 22 and Madison with 19. Oshkosh's 11 topped the CAPP group. Eau Claire had nine and Kenosha eight.

In Wisconsin, 203 districts offered no AP, 306 had no CAPP courses, and 176 districts offered neither. Forty districts offered both, and 169 offered only one kind or the other.

Of the 5,819 DPI-defined advance course opportunities statewide, over one in nine was offered in the Madison Metropolitan School District (672). Wauwatosa with 94 and Beloit with 91 were next. Twenty-two districts showed no DPI-defined advanced courses (see note earlier in this section).

Less than 1 percent of the students in grades 9-12 in Wisconsin took AP math courses. The highest percentage, 12.50 percent, was in the Mequon-Thiensville School District. No other district out of the total of 92 exceeded 7 percent. Slightly over one-half a percent of the eligible enrollment took CAPP math courses, led by Abbotsford (over 74 percent) and Eau Claire (23 percent). One district out of these 26 exceeded 7 percent. About 7 percent of the eligible number of students (in 290 districts) took DPI-defined advanced math courses. Cochrane-Fountain City and Stoughton each had over 40 percent of their student body (grades 9-12) enrolled in these classes.

Slightly over 1 percent of high school students in Wisconsin took AP science courses. Again, Mequon-Thiensville (13.50 percent of the eligible students) topped the 77 districts with offerings. No other district bettered 10 percent. Only 23 districts offered CAPP science courses, yielding a small 0.14 percent statewide participation rate. Abbotsford had 35.23 percent of its high school enrollment involved. Elk Mound and Sheboygan Falls, however, were the only other districts over 10 percent. Over 10 percent of the statewide enrollment in grades 9-12 took a DPI-defined science offering. Melrose-Mindoro led the group with over 55 percent participation, while five other districts had rates over 40 percent. Students from 333 districts were involved.

Although not all foreign languages are considered advanced coursework, they are popular among Wisconsin high school students. Statewide, 48.57 percent of the students enrolled in grades 9-12 took a language. The Verona Area School District reported 141.87 percent of its students took a foreign language, while five other districts (out of 377 total) showed enrollment over 100 percent (in other words, students took more than one language).

Only two districts, Kohler and Waupun, reported no foreign language involvement (probably an anomaly).

In addition to foreign language offerings in the "regular" curriculum, there are also AP and CAPP courses in this area. Twenty-four districts had AP and 11 had CAPP offerings. Participation rates, therefore, were low at 0.24 percent for AP and 0.08 percent for CAPP.

In the category headed "other" (see description in this section or the glossary), there are only AP and CAPP course offerings. The statewide average participation rate for AP coursework was 3.45 percent, with Rhinelander, Phelps, and Marion all exceeding 30 percent. Of the 61 districts offering some type of CAPP course in this category, Juda (73.33 percent) and Pewaukee (64.27 percent) had the most participation. The Wisconsin rate was 1.17 percent of the enrollment in grades 9-12.

Rolling all of the participation rates into a combined rate shows that 74.01 percent of all Wisconsin high school students participated in some type of advanced coursework. Many students took more than one course and are so counted in this document. Participation rates in Abbotsford and Mequon-Thiensville were over 200 percent (meaning that, on the average, every high school student took two advanced courses). Rates of over 100 percent were reported by 32 districts, while only Waupun showed no advanced course offerings.

Opportunity-to-Learn Indicators, Student Profile

The information in this section of the School Performance Report offers a snapshot of the students enrolled in Wisconsin schools during the 1993-94 school year. While this is good information, it could, if used in isolation, offer an incomplete and distorted view of the educational experience.

A better and more complete picture of Wisconsin's public schools will develop when the information in these tables is used with other information in this book and other statistics and data (i.e., family characteristics, property values, poverty and other economic indicators, etc.).

Because of this interaction, analyzing of this profile data should not be done in isolation. If any of these rates approach statewide averages, however, it should serve as a warning of possible problems. Applicable policies and practices may merit review to determine if preventive strategies and interventions, including alternative education programs, are needed.

For the first time this year, the statewide totals in the profile data tables are displayed by grade levels (K-12, K-8, and 9-12). Much of the information is more useful when considered in these groupings. For example, the number of pupils suspended in high school will always be much higher than the number of those suspended in the elementary grades. Therefore, a state K-12 rate is very misleading.

This report contains data for Wisconsin's 427 "regular" school districts and the state schools for the deaf and the visually handicapped. For that reason, there are 429 districts and 2,030 schools included.

Enrollment

District	**3rd Friday Enrollment**
State Totals/Averages (K-12)	**843,829**
State Totals/Averages (K-8)	**595,759**
State Totals/Averages (9-12)	**248,070**

Enrollment in Wisconsin public schools continues to grow. The total for the 1993-94 school year was 843,829, compared to 831,418 last year. Broken down by grade range, there were 595,759 students in grades K-8 and 248,070 in grades 9-12.

These totals continue a trend that began in the 1987-88 school year when the enrollment was 772,363. The progression has been 774,857 in 1988-89; 782,905 in 1989-90; 797,621 in 1990-91; and 814,671 in 1991-92.

The enrollment used in this section is technically known as the third Friday in September enrollment, which is collected on PI-1290, Fall Enrollment Report. It is a head count (each student is counted once, regardless of time in school) of pupils who:

- Are physically present in the school as of the third Friday in September 1993.
- Have attended school at least one day prior to the third Friday in September and are expected to attend at least one day after that date.

- Alternatively, these students could be enrolled at the school but were, as of the count date, receiving homebound services from the district.

1.	Milwaukee	95,258
2.	Madison Metropolitan	24,452
3.	Racine	22,303
4.	Green Bay Area	18,941
5.	Kenosha	17,608
6.	Appleton Area	13,845
7.	Waukesha	13,066
8.	Eau Claire Area	11,406
9.	Janesville	10,169
10.	Sheboygan Area	9,854

Figure 6: Top 10 Districts

Racine's three high schools (Horlick at 1,982, Park at 1,969, and Case at 1,872) are among the five largest schools in the state. Stevens Point Area High School (1,963) and Milwaukee Hamilton (1,833) are the third and fifth largest.

The 34 largest schools in the state (the largest being Racine Horlick, and the "smallest" Madison LaFollette at 1,438) educate 6.5 percent of the total state enrollment. All are high schools.

Wisconsin's eight largest schools (enrollments between 1,750 and 2,000) account for 15,204 children or 1.78 percent of statewide total enrollment. The next group (schools between 1,500 and 1,749) numbers 14 schools and 22,203 children (2.63 percent). Thirty-four schools have between 1,250 and 1,499 pupils for a total enrollment of 46,347 (5.49 percent). School buildings with enrollments between 1,000 and 1,249 account for 5.53 percent (46,705) students. There are 42 schools.

In the next grouping, between 900 and 999, there are 26 schools and 24,615 children (2.92 percent). Enrollments of between 800 and 899 children are housed in 41 buildings across the state. These buildings account for 34,569 pupils or 4.1 percent of the statewide enrollment of 843,829. Eighty schools are in the next group. These schools have between 700 and 799 children, enrollments of 59,759, and 7.08 percent of the total.

Of the 2,030 school buildings in Wisconsin, 431 are high schools enrolling 243,471 children. Enrollments range from eight to 1,982 and average 565. There are four school buildings referred to as generic: the state schools for the visually handicapped and deaf and the Alternative Programs and Partnership Programs in Milwaukee. Enrollment in the generic schools is 2,344, ranging from 83 to 1,223 and averaging 586.

Eighty-one junior high schools (grade range of 7-9) enroll 34,419 children in school buildings that average 424 students (ranging from 52 to 1,481). Middle schools (grade range of 6-8) include 263 buildings and 134,230 children. The average for middle school buildings is 510, and the range is 15 to 1,352.

1.	Racine	Horlick	1,982
2.	Racine	Park	1,969
3.	Stevens Point Area	Stevens Point Area	1,963
4.	Racine	Case	1,872
5.	Milwaukee	Hamilton	1,833
6.	Madison Metropolitan	West	1,826
7.	Milwaukee	Milwaukee Tech	1,805
8.	Milwaukee	South Division	1,774
9.	Fond du Lac	Goodrich	1,680

11.	Arrowhead	Arrowhead	1,648
12.	Mukwonago	Mukwonago	1,633
13.	Milwaukee	Washington	1,622
14.	Milwaukee	Bay View	1,618
15.	Eau Claire Area	Memorial	1,603
16.	Eau Claire Area	North	1,581
17.	Appleton Area	West	1,558
18.	Kenosha	Bradford	1,542
19.	Milwaukee	Pulaski	1,526
20.	Janesville	Craig	1,506

Figure 7: The Largest 20 Schools

The final group of schools, elementary buildings, is the largest. There are 1,251 buildings enrolling 429,365 children. The smallest building has 11 pupils and the largest 1,020. The average enrollment is 586.

Attendance

District	Attendance (K-12)		
	Possible Days of Attendance	Actual Days of Attendance	Attendance Rate
State Totals/Averages (K-12)	**145,046,974.5**	**136,489,961.5**	**94.10**
State Totals/Averages (K-8)	**102,071,309.5**	**96,857,878.0**	**94.89**
State Totals/Averages (9-12)	**42,975,665.0**	**39,632,083.5**	**92.22**

There is little doubt that there is a definite link between learning and being in school. Although there is much more to education that seat time, attendance is a key component.

This report defines attendance as face-to-face contact between an instructor and a student. The number of days students can expect this contact, according to the school calendar, are possible days of attendance, while the number of days a student is actually in contact with a teacher are actual days of attendance. The smallest reportable unit of attendance, for purposes of the School Performance Report, is one-half day.

The attendance rate reported in the book is calculated by dividing the actual days by the possible days of attendance.

Attendance is, basically, a function of enrollment. Not surprisingly, therefore, the rank order of districts and schools by the number of possible and actual days of attendance is virtually identical to the order of schools and districts by enrollment.

The attendance rate is a different matter. Fourteen districts exceeded a rate of 97 percent. Thorp topped the list with 97.76 percent. At the other end of the spectrum, there were four districts below 90 percent: Wilmot and Lakeland (both union high school districts), Milwaukee, and Menominee Indian.

Individual school attendance rates ranged from 99.54 percent at Weyauwega Elementary School (one of six schools exceeding 99 percent) to nine schools below 75 percent. The bulk of the facilities in the latter group offered special programs for high school students with unusual problems. All were in Wisconsin's urban centers: Milwaukee, Madison, Racine, and Kenosha.

For the first time this year, School Performance Report information is displayed by grade range. This should allow districts and schools throughout the state to take a better look at their own situation. For the 1993-94 school year, average K-8 attendance rate in Wisconsin was 94.89 percent, and the 9-12 rate was 92.22 percent. The average K-12 rate was 94.10 percent.

Although not displayed, the data was examined for type of school. Those facilities describing themselves as high schools reported an average 1993-94 attendance rate of 92.37 percent. The junior high rate was 94.03 percent, and the middle school rate was 93.78 percent. Elementary grades reported an average attendance rate of 95.35 percent, while the rate for the "generic" schools defined earlier was 69.47 percent.

Out-of-School Suspensions

District	Out-of-School Suspensions (K-12) - State Totals/Averages				
	No of Pupils Susp.	% of Pupils Susp	No. of Susp.	No. of Days Susp.	Susp. Rate
State Totals/Averages (K-12)	**51,562**	**6.11**	**120,068**	**234,732.5**	**0.162**
State Totals/Averages (K-8)	**24,877**	**4.18**	**59,323**	**120,142.0**	**0.118**
State Totals/Averages (9-12)	**26,685**	**10.76**	**60,745**	**114,590.5**	**0.267**

Suspensions are one type of discipline available to school districts. Out-of-school suspensions (exclusion from school) usually address the more serious violations of rules and procedures, while the in-school variety (exclusion from the classroom) are reserved for less serious offenses.

Out-of-school suspensions can be imposed for up to three days. If the suspension goes longer than three days (and up to 15 days), the school district must give notice that an expulsion hearing will be held.

Suspensions are reported at all grade levels. The suspension data table (only out-of-school suspensions) includes the number of pupils suspended (counted only once) and that number as a percent of the district's/school's third Friday enrollment. Also reported are the number of suspensions reported, the number of days lost to

BEST COPY AVAILABLE

suspension, and the suspension rate, which is number of days lost divided by the possible days of attendance.

Although out-of-school suspensions are reported in this document, in-school suspensions are widely used and effective. These suspensions can be served in a variety of places, ranging from libraries to rooms set aside for student discipline. In-school suspensions were an optional collection of the School Performance Report. They are not detailed here, but specific district reports may include this information.

As would be expected, the state's largest districts and schools have the largest entries in the columns dealing with absolute numbers (number of suspensions, number of days suspended, and number of pupils suspended). Twenty-eight districts and 681 schools, on the other hand, had no suspensions.

Among the 29 schools that suspended more than 300 students each, 22 were in Milwaukee and five were in Racine, including Horlick High School, which led the list with 573 suspended students. The pattern was similar for the number of suspensions. Milwaukee had the most schools reporting over 800 suspensions, but Kenosha replaced Racine with the second most schools in the "top 31" (schools with over 800 suspensions). Racine Gilmore Middle School had the most suspensions in the state, 2,419, while no other school exceeded 1,900.

Of the 29 schools with more than 1,750 days lost to suspension, all were in Milwaukee, Racine, or Kenosha. Milwaukee's Burroughs Middle School reported the most days lost to suspension at 4,837.

Once percentages enter the picture, the scene changes. While the state average percent of pupils suspended (as a percentage of enrollment) was 6.11 percent, three districts topped 20 percent: Lac du Flambeau #1, an elementary-grade-only district at 22.52 percent; Winter at 21.22 percent; and Menominee Indian at 21.08 percent. No other district exceeded 16 percent.

Again, it is informative to view the percent of pupils suspended by grade range. The state K-12 average was 6.11 percent, but the K-8 rate was only 4.18 percent. The 9-12 rate of students suspended was 10.76 percent. This effect is apparent in looking at the top 50 schools in terms of percent of pupils suspended. All 10 union high school districts are represented. With the exception of two alternative programs in Racine (with rates over 100 percent), the highest percentage was reported by Parkman Middle School in Milwaukee (60.21 percent). Five other Milwaukee middle schools and the Menominee Junior High School were over 50 percent.

The state average suspension rate (days lost to suspension divided by possible days of attendance) was 0.162 percent. As reported previously, the rate for the K-8 grades (0.118 percent) was lower than the rate for the 9-12 alignment grades (0.267 percent).

Menominee Indian, Racine, and Milwaukee districts exceeded 0.5 percent, and another seven districts fell between 0.5 percent and 0.35 percent. Among individual schools, Racine Washington Center (listed as an elementary school) had a suspension rate of 4.748 percent. Milwaukee Burroughs Middle School had the next highest rate, 3.103 percent, followed by 11 other Milwaukee middle schools and Racine Gilmore Middle School, all over 2 percent.

The summary of suspension rates by school type verifies that middle schools report the highest rate. Although the statewide K-12 average is 0.162 percent, middle schools report a rate of 0.364 percent. Junior high schools are next at 0.333 percent, followed by high schools at 0.257 percent. The "generic" schools, 0.243 percent, and elementary schools, 0.026 percent, report the smallest suspension rates.

Expulsions

District	Expulsions (K-12) - State Totals/Averages			
	No. of Pupils Expelled	% of Pupils Expelled	No. of Days Expelled	Expulsion Rate
State Totals/Averages (K-12)	**918**	**0.11**	**41,801**	**0.029**
State Totals/Averages (K-8)	**279**	**0.05**	**13,404**	**0.013**
State Totals/Averages (9-12)	**639**	**0.26**	**28,397**	**0.066**

The most serious disciplinary action a school district can take against a student is expulsion. It is a formal action taken by a school board and is defined in ss. 120.13(1)(c) and 119.25, Wis. Stats. An expulsion, because it is a sanction that prohibits a child from attending school, is often the final step in the disciplinary process.

Expulsion information includes the number of pupils expelled (unduplicated), the percent that number is of the student body, the number of days all students are expelled during the school year, and the expulsion rate, which is the number of days lost to expulsion in grades K-12 divided by the third Friday in September enrollment (K-12).

Statewide, the number and rate of expulsions has increased dramatically over the past three years, corresponding to an increased awareness of violence and safety in the school setting. The number of expelled pupils increased from 405 in the 1991-92 school year to 536 during 1992-93, with a corresponding hike in days lost to expulsion from 24,075 to 28,779. The 1992-93 expulsion rate was 0.020 percent statewide.

Last year, the number of pupils expelled skyrocketed 171 percent to 918, including 279 in grades K-8 and 639 in grades 9-12. During the 1993-94 school year, 41,801 days were lost to this form of discipline, an expulsion rate of 0.029 percent (0.020 percent for 1992-93).

Racine, 145 students, and Milwaukee, 86, topped the list of expulsions across the state. Although the information tables in the appendices of this book show that 190 students were expelled in West Allis, that is in error. Only one student was expelled during the 1993-94 school year (see Errata).

Although Milwaukee reported the second highest number of pupils expelled, the district did have the most days lost to expulsion, 7,321. Beloit was second with 2,795, followed by Racine at 2,009. Across the state, 280 districts and 1,772 schools reported no expulsions.

The largest number of expulsions as a percent of the student body, 1.93 percent, was reported by the Menominee Indian School District. Statewide, the rate was 0.11 percent. The only other district over 1 percent, St. Francis, reported 1.55 percent of the student body expelled.

Among individual schools, Racine's Washington Center reported one-third of its 21-member student body expelled. Menominee Junior High School and St. Francis High School were the only other schools over 5 percent.

The average expulsion rate was 0.029 percent across Wisconsin. The rate was highest in the Menominee Indian district, at 0.696 percent, followed by St. Francis at 0.561 percent. No other district exceeded 0.5 percent. At the school level, Menominee Junior High School (2.668 percent) was highest. Four other schools topped 1 percent.

Although middle school students had the highest suspension rate (0.333 percent), junior high school students had the highest expulsion rate (0.077 percent). The rate for middle schoolers was only 0.033 percent, and for high school students it was 0.064 percent. Because of the special nature of the "generic" schools, a disproportionate number of days was lost to expulsion (0.089 percent). As would be expected, expulsions were seldom used at the elementary school level, where the rate was only 0.002 percent.

Retentions

District	3rd Friday Enroll-ment*	Retentions* (K-12) - State	
		No. of Reten-tions	Reten-tion Rate
State Totals/Averages (K-12)	**826,644**	**18,044**	**2.183**
State Totals/Averages (K-8)	**578,574**	**4,268**	**0.738**
State Totals/Averages (9-12)	**248,070**	**13,776**	**5.553**

* Doesn't include EEN (ages 3-5), birth through age 2 program, Chapter 1 Preschool Head Start, and four-year-old kindergarten.

Children can be retained in grade if they don't make sufficient progress in the course of study established by local school boards. The use of retentions, especially at the upper grade levels, however, is the subject of debate throughout Wisconsin. For social and academic reasons, students are not retained in grade in many high schools. Instead, they are short credits at the end of four years and must return as fifth year seniors to graduate.

Because the Legislature required that a retention rate be published in the School Performance Report—but understanding that retentions aren't universally used, a definition was developed for purposes of comparability between districts:

- A pupil is retained in grades K-8 if, at the end of any year, it is decided by administrators, parents, and teachers that he or she will repeat a grade.

- A pupil is retained in an ungraded instructional unit if a pupil needs an additional year to complete a prescribed program (this will occur in only rare circumstances).

A pupil is considered retained in grades 9-12 if, at the end of any year, he or she has a deficit of equal to or more than one-seventh of the district's high school graduation requirements. For example, a high school student in a district that requires 21 credits for graduation will be considered retained if that student, at the end of any year, is three credits short of where he or she should be. In this district, a student should complete 5.25 credits each year to reach 21 credits in four years. A "retained" student will be at 2.25 credits or less at the end of the freshman year (one-seventh of 21 credits is three credits); 7.50 credits or less at the end of the sophomore year (10.50 minus 3); 12.75 credits or less at the end of the junior year (15.75 minus 3); or 18 credits or less as a senior (21 minus 3).

Remember, in most cases this definition is used by districts for School Performance Report purposes only. Most state high schools don't actually retain students in grade. The data in the table, therefore, represents hypothetical situations. In other words, although the statewide retention table shows 13,776 students retained for a 5.553 percent retention rate, it is safe to say that these numbers are overstated.

Retentions are reported for students in grades K-12 only. Young people in EEN (ages 3-5), birth through age 2 program, Chapter 1 Preschool, Head Start, and 4-year-old kindergarten are not included.

The retention rate is calculated by dividing the number of retentions at the end of the school year by the third Friday in September enrollment.

Retentions, both number and rate, have fluctuated over the three years they have been collected for the School Performance Report. From a high of 20,205 (and a rate of 2.5 percent) during the 1991-92 school year, retentions dropped to a low of 17,632 (a rate of 2.121) for 1992-93. There were 18,044 retentions (a rate of 2.183 percent) during the 1993-94 school term.

As would be expected, large districts had the largest number of retentions. Forty-four schools, all high schools, exceeded 100 retentions. At the other end of the spectrum, 59 districts and 873 schools reported no entries in this category.

Among districts, Union Grove Union High School topped the list, retaining nearly one of every eight students. Another union high school district, Waterford, was the only other one to top a 7 percent retention rate. Two alternative facilities in Racine, the Mack Achievement Center and Brown Alternative High School, reported the highest rate for individual schools.

Habitual Truancy

District	Habitual Truancy* (K-12) - State Totals/Averages	
	No. of Habitual Truants	Habitual Truancy Rate
State Totals/Averages (K-12)	**45,936**	**5.557**
State Totals/Averages (K-8)	**12,336**	**2.132**
State Totals/Averages (9-12)	**33,600**	**13.545**

The collection of habitual truancy is new to this year's report. It is defined in law and reflects the number of students missing school without an acceptable excuse.

According to s.118.16(1)(c), Wis. Stats., a truancy is an absence of part or all of one or more days during which school personnel have not been notified. It also mentions that a truancy can be "intermittent attendance carried on for the purpose of defeating the intent of" the state's compulsory attendance law.

Once identified as an habitual truant, a student is subject to rules, regulations, and supervision in the justice and social services system.

Truancy, therefore, Is defined as an unexcused absence, and unexcused absences are decided at the school district level. For that reason, it is difficult to compare the habitual truancy rates of districts. For example, being late for first period might be an unexcused absence (and a truancy) in a large district but no cause for alarm in a small district.

Habitually truancy is: A student who is truant (an unexcused absence) for five or more days out of 10 consecutive days in a semester, or a student who is truant (an unexcused absence) for 10 or more days in the semester.

Habitual truants are reported only once during a school year and by the school of attendance when the student was found to be habitually truant. The collection is for grades K-12 only. (Students in EEN programs (ages 3-5), the birth through age 2 program, Chapter 1 Preschool, Head Start, and 4-year-old kindergarten aren't included.)

During the 1993-94 school year (the first for this collection), a total of 45,936 students in grades K-12 (5.557 percent) fit the definition of habitual truancy. The bulk of the pupils (33,600) were in grades 9-12. This represents 13.545 percent of the 248,070 in this group. At the K-8 level, only 12,336 children were found to be habitually truant. This is 2.132 percent of the 578,574 students in this category.

A further breakdown by grade level finds 2,103 habitual truants among the 34,419 students enrolled in Wisconsin's junior high schools, 6.110 percent. Of the 134,195 middle school pupils, 4.388 percent (5,888) were habitually truant. About 5,090 elementary school students (1.235 percent of the 412,257 enrolled) were habitually truant.

Nearly one-half of the state's habitual truants, 21,645 students, were reported in Milwaukee Public Schools. Racine is next at 2,210, with another five districts reporting over 1,000. Of the 20 schools with the highest number of habitual truants (all over 500), 14 are in Milwaukee, Stevens Point, Racine Horlick, Janesville Park and Craig, and Memorial High School and McNeel Junior High School in Beloit.

Ninety-eight districts and 1,159 schools reported no habitual truants.

The habitual truancy rate was highest in the Necedah Area School District where over one-third of the children fit the definition. Beloit and Milwaukee were next, each with nearly one-quarter of the student body reported. Seven other districts ranged between 10 and 15 percent.

Washington Center in Racine and Reuther in Kenosha reported the state's highest habitual truancy rates at 117 and 100 percent, respectively. Both schools deal with alternative program students. The remainder of the top 21 schools, all reporting habitual truancy rates over 50 percent, include 17 Milwaukee high and middle schools and a pair of junior high schools in Beloit.

Dropouts

District	3rd Friday Enroll-ment	**Dropouts (9-12) - State Totals/Averages**	
		No of Dropouts	Dropout Rate
State Totals/Averages (K-12)			
State Totals/Averages (K-8)			
State Totals/Averages (9-12)	**248,070**	**7,401**	**2.983**

Those interested in education are always concerned about those students who prematurely end their school experience. Despite ongoing and comprehensive efforts, some young people leave prior to graduation. For purposes of this report, they are referred to as dropouts.

The School Performance Report asks districts to report as dropouts any student who stops attending school, doesn't return, and isn't in attendance on the last day of classes. A student meeting these criteria isn't a dropout, however, if he or she has transferred to another school, is excused, imprisoned, or hospitalized, or has died.

In this report, the dropout rate is the number of dropouts divided by the third Friday in September enrollment in grades 9-12 only.

During the first year of this report (1991-92), there were 5,126 dropouts statewide, for a rate of 2.8 percent. The numbers soared for 1992-93 to 7,638 dropouts (3.192 percent), before falling back slightly last year to a rate of 2.983 percent (7,401 dropouts in grades 9-12).

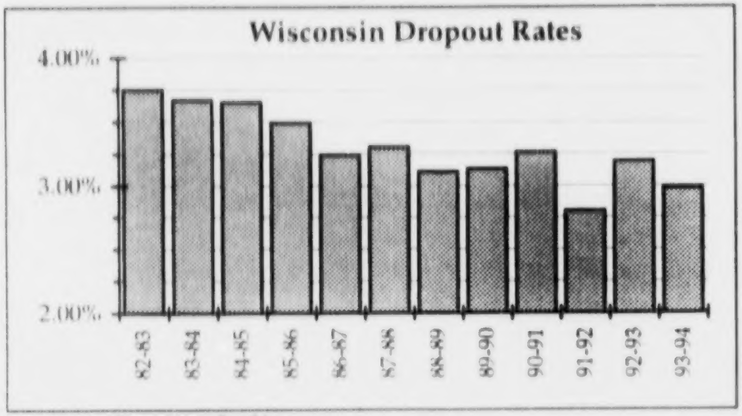

Figure 8: Dropouts by Year

Because the rate is calculated for those in grades 9-12, Wisconsin's 47 elementary-only districts are not included. This means that 1,549 schools are excluded. The basis for comparison, therefore, is 382 districts and 481 schools enrolling 248,070 students.

As would be expected, the state's largest school district accounted for the majority of the dropouts. Milwaukee topped the list with 3,409 dropouts (46 percent of the total). The next five districts, all with between 100 and 400 dropouts, accounted for another 16 percent.

Milwaukee Alternative Programs, schools addressing the special needs of troubled students, reported that 805 of its students had dropped out. Milwaukee Partnership Programs listed 321 dropouts. Milwaukee South Division lost 333 students, while three other Milwaukee high schools were in the 200s.

No dropouts were reported by 83 districts and 131 schools.

It is no surprise that Milwaukee, the state's only large metropolitan area, has the largest dropout rate at 15.373 percent. Two other large districts, Beloit and Racine, were in the 6 percent range. Two anomalies were West Allis and White Lake. The dropout rate shown in the table for West Allis was reported in error (see Errata). It should actually be 72 dropouts for a rate of 2.545 percent. Also, White Lake, with only five dropouts, shows a rate of 6.67 percent (which is second only to Milwaukee) because the grade 9-12 enrollment is only 75.

Alternative education programs in Milwaukee, Madison, and Racine recorded the highest dropout rates for schools. In addition to the Milwaukee Alternative Programs and Partnership Programs, Racine Mack Achievement Center (69 percent) and Madison Work and Learning High School (42 percentage) topped the list. Milwaukee North Division and Milwaukee Madison high schools were the only other institutions where the dropout rate exceeded 20 percent.

School-Sponsored Community Activities

District	School-Sponsored Community Activities (9-12)			
	No. of Offer-ings	Participation Rate		
		Required	Voluntary	Overall
State Totals/Averages (K-12)				
State Totals/Averages (K-8)				
State Totals/Averages (9-12)	5,030	30.3	15.3	45.6

Most Wisconsin schools don't, as of yet, offer community service curriculum. There is, however, a growing trend to broaden the educational experience to include more interaction with the community.

To measure this interaction, the School Performance Report collects school-sponsored community activities. These activities emphasize service to and involvement with the community.

This report tracks these activities in two areas:

- Required: Activity is mandatory or a grade is given or there is credit for graduation.
- Voluntary: Activity is not mandatory, and no grade or credit are given.

The school-sponsored community activity table shows the number of offerings within a school district in grades 9-12. The participation rate is the non-duplicated count of the number of participants divided by the third Friday in September enrollment and expressed as a percentage. The overall participation rate is the sum of the required and voluntary rates.

Across Wisconsin there were 5,030 school-sponsored community activities offered in 385 schools in 328 districts. Required activities were participated in by 30.3 percent of the state's 9-12th grade enrollment of 248,070, and voluntary activities involved 15.3 percent. The overall rate of participation was 45.6 percent.

It is not surprising to find that large districts had a large number of offerings. Milwaukee was number one with 254 offerings, while Waukesha was third with 133. At the same time, however, smaller districts have the opportunity to shine. Ashwaubenon was number two with 150 school-sponsored community activity offerings, and Ladysmith-Hawkins was number four with 112.

For individual schools, Ashwaubenon High School topped the list with 150, followed by Ladysmith-Hawkins High School at 112 and Lake Mills and Luck high schools at 82 each. The next 10 schools fell between 50 and 75 offerings.

Lake Mills topped the list of districts with 169 percent participation in voluntary activities. Prairie Farm, Green Lake, and Luck also exceeded 100 percent, and five districts were at 100 percent. The high schools in these districts topped the list of individual schools, joined by Superior East Junior High School at 100 percent.

The top rate for required school-sponsored community activities belonged to Beloit at 145 percent, followed by Boscobel, Stratford, Lancaster, and Green Lake, all over 100 percent. Eight other districts were at exactly 100 percent. The top school rates were all for junior high schools: Beloit McNeel at 481 percent, Ellsworth at 290 percent, Superior Central at 197 percent, and Appleton Einstein at 182 percent. Six other schools fell between 103 percent and 127 percent, and seven were exactly at 100 percent.

Most of the districts and schools already mentioned topped the list of overall or combined participation rates, with the addition of Waterloo, Monticello, and Wisconsin Heights, all over 200 percent.

Extra/Co-Curricular Activities

District	Extra/Co-Curricular Activities (6-12)**					
	3rd Friday Enrollment	No. of Offerings	Participation Rates			
			Academic	Athletic	Music	Overall
State Totals/Averages (K-12)	**442,661**	**26,164**	**36.1**	**49.3**	**25.3**	**110.7**
State Totals/Averages (K-8)						
State Totals/Averages (9-12)						

** All numbers in this category refer to grades 6-12 only.

Extra/co-curricular activities offer a wide variety of opportunities outside of those in a district's regular curriculum. These activities are usually designed to broaden, develop, and enhance the school experience in the areas of academics, athletics, and music.

Only students in grades 6-12, 442,661 during the 1993-94 school year, are included in this report. Those students were enrolled in 1,312 schools in all of Wisconsin's 429 districts (including the state schools for the deaf and the visually handicapped).

As was the report for school-sponsored community activities, this report is based on the number of offerings within a school or district. The participation rate is the unduplicated count of students taking part in an extra-curricular area, and the overall or combined rate is the total of the individual rates.

Statewide, 26,164 extra-curricular groups or activities were offered, and a combined rate 110.7 percent of the sixth through 12th grade enrollment took part. The largest participation rate, 49.3 percent, was for athletics, with academic participation at 36.1 percent of the 1993-94 student body and music at 25.3 percent.

The largest number of extra-curricular groups or activities (2,158) were offered in LaCrosse. Milwaukee was second with 1,139, followed by Green Bay at 629, Sheboygan at 495, and Madison at 435.

Among individual schools, LaCrosse Logan High School was at the top of the list with 2,049 offerings, far ahead of second-place Madison East at 101 and five Sheboygan high and middle schools at 99 offerings each. In contrast to Logan, LaCrosse Central High School was 84th on the list with only 47 offerings.

Three districts (Norris, Shell Lake, and Holmen) and 251 schools reported no extra-curricular offerings. The schools in this group include some of the largest facilities in the state, such as Milwaukee Vincent High School (1,373 students), Merrill Junior High School (861), and South Milwaukee Middle School (834 children).

(Note: Because of apparent anomalies in this report and in the report on school-sponsored community activities, it is apparent that much work remains to be done in terms of collection and definition. These activities are important enough to children, however, that the School Performance Report staff will continue to work with the data and other agencies to try to make the information more useful and meaningful.)

Two elementary-only districts, Erin #2 and Wilmot Grade, topped the list of participation in academic extra-curricular activities with 274 percent each. Two other elementary districts, Boulder Junction J1 (240 percent) and Richfield J1 (182 percent) were third and fourth. Seven other districts were over 100 percent, while eight districts had no participation.

The top schools were in the districts already mentioned, along with Elm Lawn Elementary School in the Middleton-Cross Plains School District (395 percent), Kimberly's Gerritts Middle School (272 percent), and Appleton's Highlands Elementary School (263 percent). Another 29 schools fell between participation rates of 100 and 200 percent, while 42 facilities had no extra-curricular participation.

A host of elementary-only districts topped participation in athletic activities, including Richfield J1 (308 percent), Wilmot Grade (285 percent), and Richmond (227 percent). Another 10 districts (including six elementary-only) were over 100 percent. Only three districts reported no participation.

Baraboo's North Freedom Elementary School and Marshall Junior High School (both at 257 percent) joined schools in the districts already mentioned at the top of the facility participation rate in extra-curricular activities. Forty-three schools were over 100 percent, and 327 were at zero.

In the category of music, Green Lake had the highest district participation rate at 195 percent. Richmond, Wilmot Grade, Erin #2, Linn J6, Boulder Junction J1, Goodman-Armstrong, Paris J1, and Washington-Caldwell were all at or above 100 percent. Seventeen districts reported no participation.

Green Lake Elementary School was the most active school, musically, with a participation rate of 240 percent. Two Baraboo elementary schools, Fairfield Center (214 percent) and North Freedom (173 percent), were two and three. Another 19 schools were over 100 percent, and an additional 19 were at exactly 100 percent. No participation in extra-curricular musical events was reported at 349 schools.

The overall (or combined) rate of participation in extra-curricular events exceeded 100 percent in 328 districts and 728 schools. Elementary-only districts, led by Wilmot Grade at 676 percent, occupied eight of the top 10 spots on the list. Only Green Lake (407 percent) and Monticello (277 percent) represented the K-12 districts.

Of the top 10 schools, many were the one and only elementary school operated by one of the districts mentioned in the preceding paragraph. Green Lake High School (496 percent) and Kimberly's Gerritts Middle School (401 percent) were the only non-elementary-only facilities on the list. Wilmot Grade (676 percent) was number one. A combined rate of zero was reported by 252 buildings.

Opportunity-to-Learn Indicators, District Profile

Staffing Ratios

District	District Pupil/Staff Ratio							
	Licensed Instruction		Administrative		Aides		Overall	
	FTE	Ratio	FTE	Ratio	FTE	Ratio	FTE	Ratio
State Totals or Averages	60,246.92	14.01	3,147.91	268.06	26,329.77	32.05	89,724.60	9.40

When used in conjunction with other information in the School Performance Report, staffing ratios offer those concerned about education in Wisconsin a meaningful view of one aspect of the process.

Staff numbers used in this report are collected by the Department of Public Instruction from school districts on Form PI-1202, Fall Staff Report. It is not, strictly speaking, a report about people. Rather, it asks districts to report personnel according to full-time equivalency (FTE), which is the ratio of time spent on the job divided by a standard work week. For example, a kindergarten teacher with only morning classes would be 0.5 FTE.

Although the report does not show class size, it does display a pupil-to-staff ratio. The ratio is shown for licensed instructional staff (those who provide professional services to students), administrative staff (those performing leadership and organizational functions), and aides and support personnel (those providing auxiliary functions to students). Also, an overall ratio shows the number of pupils in comparison to total staff members.

The various staffing categories are defined as follows:

- Licensed Instruction—Teachers, subject coordinators, reading specialists, department heads, teachers in charge, school social workers, guidance counselors, school psychologists, physical therapists (and assistants), occupational therapists (and assistants), program coordinators, school nurses, librarians, library media specialists, educational audiologists, audiovisual/technology specialists, and speech/language pathologists.
- Administrative—District administrators, assistant district administrators, business managers, directors of instruction/supervisors, principals, assistant principals, supervisors of special education (A and B), directors of human relations/multicultural education/equity, directors of special education and pupil services, and library media supervisors.
- Aides/Support/Other—Bus drivers, clerical staff, plant operation personnel, plant maintenance personnel, cafeteria workers, athletic coaches, educational interpreters-hearing impaired, advisors to student clubs, administrative assistants, directors of transportation, directors of athletics, directors of public relations, recreation department staff, research personnel, program aides, other support staff, and other professional staff in non-educational roles.

The overall pupil/staff ratio in Wisconsin's 429 school districts increased by one from 1992-93, when it was 8.81 students per staff member (FTEs), to 1993-94, when it was 9.4 pupils per staff member. In the first year of this report (1991-92 school year), the ratio was 9.2:1. In the 1993-94 school year, there were 89,724.6 total FTEs, with 67.2 percent (60,246.92) listed as licensed instruction, 3.5 percent (3,147.91) designated as administrative, and 29.3 percent (26,329.77) in the aides/support/other category.

All three categories of staff have shown a general increase of pupils per staff member over the past three years. In 1991-92, there were 14.7 students per licensed instructional staffer (55,233.7 FTEs), a ratio which decreased to 13.97 for 1992-93 (59,503.13 FTEs) before easing back up to 14.0 last year (60,246.92 FTEs).

The number of administrators has decreased each of the last three years. In 1991-92, there were 4,827.3 FTEs, an average ratio of 168.8 students per staffer. By 1992-93, the number had dropped to 3,178.6 (a ratio of 261.6 to 1) and to 3,147.91 last year (268.06 to 1).

An up-and-down pattern similar to that in the licensed instruction group was seen in the aides/support/other category. There were 28,275 FTEs during the 1991-92 school, a ratio of 28.8 students per staff member. The ratio dipped the next year to 26.25 to 1, reflecting an increase to 31,676.31 FTEs. By the last school year (1993-94), however, the ratio had climbed above the 1991-92 total to 32.05 based on 26,724.6 FTEs.

In the licensed instruction grouping, the state average is 67.15 percent of the total district FTE. Wilmot Grade School District is the only district in the state that assigned all employees to this category. The state's two largest districts, Milwaukee and Madison, rank fifth and second with 86.42 and 89.31 percent, respectively.

At the other extreme, as would be expected, are the state's residential schools. The Wisconsin School for the Visually Handicapped (WSVH) lists 38.83 percent of its FTEs as instructional, and the Wisconsin School for the Deaf (WSD) has 41.56 percent allotted to this category. The lowest "regular" school district is Tigerton at 48.48 percent.

The Wisconsin average pupil-to-instructional-staff-member ratio was 14.01 to one. Salem J2 and Florence were the only districts above 17:1. The lowest ratios were in three residential facilities: WSVH at 2.22:1, WSD at 3.11:1, and Norris at 3.93:1. These districts were followed by Linn J4 at 7.48, Linn J6 at 9.02, Menominee Indian at 9.12, and two of the state's smallest K-12 districts, Weyerhaeuser and Washington, tied at 9.58. Five other districts had ratios under 10, and another 14 were below 11:1.

Administrative staff FTEs average 3.51 percent of total FTEs statewide, ranging from a high of 11.91 to 1 in Norway J7 to a low of zero in Wilmot Grade. Madison, the state's second largest district, reports the next lowest number, 1.49 percent.

The highest pupil-to-staff ratio was computed for Madison at 730 administrators per student. Next were Oostburg and Merton J9, the only districts in the 600s. The lowest ratios in this category were in the same three residential schools already mentioned. Again, among "regular" districts, Linn J4, Norway J7, Goodman-Armstrong, and Dover #1 were the only other districts below a ratio of 100:1.

In the final category of overall pupil-to-staff ratio, the Wisconsin average was 9.4 to 1. Wilmot Grade, Milwaukee, and Superior topped 13:1, and Salem J2 was at 12.76 to 1. All other districts were below 12. WSVH and WSD were approximately 1:1, Norris was 3.11:1, Menominee Indian was 5.18:1, and four other districts were below 6:1.

High School Graduation Requirements

High School Graduation Requirements											
English	Foreign Language*	Computer Science	Math	Science	Social Studies	Fine Arts*	Phy Ed	Health	Voc Tech*	Electives*	Total
4.00	0.00	0.00	2.00	2.00	3.00	0.00	1.50	0.50	0.00	8.50	21.50

* In addition to required credits, the state superintendent encourages districts to require a minimum of 8.5 electives in vocational education, foreign language, fine arts, or other electives.

By statute, Wisconsin high school graduates will have achieved a minimum number of credits in specific subjects:

- 4 credits of English
- 2 credits of mathematics
- 2 credits of science
- 3 credits of social studies
- 1.5 credits of physical education
- 0.5 credits of health

Additionally, the state superintendent of public instruction encourages school boards to require 8.5 "other" credits. Many districts arrive at a total of 21.5 credits by establishing higher standards for required courses, while others reach it through electives, such as foreign language, computer science, fine arts, and vocational-technical education.

By administrative rule, a credit has been defined as successful completion of a school term of study in one course that meets daily for a normal class period (or the equivalent of a normal class period as established by local school board policy). A course is generally worth one credit if it meets for approximately 45 to 55 minutes per day for up to 180 school days.

Wisconsin requires four credits in English, and 371 of 382 districts with high schools require exactly that. One district specifies 4.25 credits, six more ask for 4.5, and one requires five credits. The top requirement is at the Wisconsin School for the Deaf (WSD) where students need eight credits of English to graduate.

In mathematics, two credits are required for graduation, a standard that prevails in 336 districts. Thirteen districts, however, require 2.5 credits, 30 expect three credits, and Auburndale asks four credits.

Across the state, 339 districts expect the statutory minimum of two science credits. Ten others ask for 2.5, 30 districts require three credits, and, again, Auburndale tops the list asking for four credits.

In the area of social studies, Weyerhaeuser asks the most credits at five. The standard of three credits is asked by 278 districts. Forty-seven districts expect 3.5 credits, and 54 want four credits.

The minimum physical education requirement of 1.5 credits is achieved by 291 districts, while an additional 80 districts require two credits. Six expect 2.5, and three—WSD, Holmen, and Marinette—ask for three credits of physical education.

Of the 382 districts with high schools, 353 require 0.5 credits of health. Eight other districts look for 0.75 credits, 18 want a full credit, and one, North Fond du Lac, requires 1.25 credits.

Two districts, Monticello and Laona, require a credit each of foreign language. Eighty-nine districts require 0.5 credits of computer science, while nine others ask for a full credit. Glidden, Gilmanton, and Beecher-Dunbar-Pembine have the highest requirement, 1.5 credits.

Another 37 districts impose, on their own, graduation requirements in the area of fine arts (either 0.5 or a full credit). Deerfield asks for four credits, while New Berlin and White Lake each require 1.5. Finally, 63 districts have decided to have requirements in vocational-technical education. Of the 10 districts that ask at least one credit, WSD at 5.5 and New Auburn at four expect the most.

Although no Wisconsin school districts failed to meet the minimum number of graduation requirements in the specific subject areas mentioned, 15 do fall short of the state recommendation of 21.5. Manitowoc and Whitefish Bay require the fewest credits at 20. Twenty districts require the 21.5 credit recommendation.

At the other end of the spectrum, WSD asks for 29.5 credits for graduation. Birchwood and Whitehall are at 27 credits, and Lake Holcombe and New Berlin require 26.5 credits. Twenty-two credits are required for graduation in 109 districts (the most widespread number), while another 104 districts ask for 24 credits.

It should be noted, however, that districts with fewer periods in the school day frequently have a lower total of required graduation credits. Conversely, districts with shorter class periods and more periods in the day would be expected to have more credits required for graduation.

Opportunity-to-Learn Indicators, Financial Information

Financial information in this report was obtained from the 1993-94 annual reports from Wisconsin school districts. The annual reports, which contain final and actual expenditures and revenues, are submitted at the close of each school year. These reports are audited annually. Because of the timing of the School Performance Report, however, the auditing process hasn't been completed for all districts.

Fiscal information for all 427 school districts contained in this document. Financial operation of the schools for the visually handicapped and the deaf are part of the biennial budget of the Department of Public Instruction and are not, therefore, included here. Included are 370 kindergarten through 12th-grade districts, 47 elementary (K-8) districts, and 10 union high school (UHS) districts. Keep in mind that the operations of K-12, K-8, and UHS districts are significantly different, which will affect revenues and expenditures. Three of the K-8 districts overlap UHS boundaries: Brighton #1, Salem J2, and Wheatland J1.

- Arrowhead UHS
    - Hartland J3
    - Lake Country
    - Lisbon J2
    - Merton J7
    - Merton J9
    - Stone Bank
    - Swallow
- Big Foot UHS
    - Fontana J8
    - Linn J6
    - Sharon J11
    - Walworth J1
- Central/Westosha
    - Brighton #1
    - Bristol #1
    - Paris J1
    - Salem J2
    - Wheatland J1
- Hartford UHS
    - Erin #2
    - Hartford J1
    - Herman #22
    - Neosho J3
    - Richfield J1
    - Richfield J11
    - Rubicon J6
- Lake Geneva-Genoa City UHS
    - Geneva J4
    - Genoa City J2
    - Lake Geneva J1
    - Linn J4
- Nicolet UHS
    - Fox Point
    - Glendale-River Hills
    - Maple Dale-Indian Hill
- Lakeland UHS
    - Boulder Junction J1
    - Lac du Flambeau #1
    - Minocqua J1
    - Woodruff J1
- Union Grove UHS
    - Brighton #1 (7%)
    - Dover #1
    - Raymond #14
    - Union Grove J1
    - Yorkville J2
- Waterford UHS
    - Norway J7
    - Raymond J1
    - Washington-Caldwell
    - Waterford J1
- Wilmot UHS
    - Randall J1
    - Salem #7
    - Salem J2 (4%)
    - Silver Lake J1
    - Twin Lakes #4
    - Wheatland J1 (35%)
    - Wilmot Grade

Figure 8: Union High School Systems and Feeder Elementary Schools

Wisconsin school districts use the Wisconsin Elementary and Secondary School Accounting System (WESSAS). This uniform financial accounting system organizes financial information by funds (accounting entities for the purpose of attaining certain objectives) and by functions (activities performed to accomplish those objectives).

The School Performance Report displays information for General Fund revenues and expenditures only. This fund represents over 90 percent of the total school district financial activity statewide. Other funds (i.e., special projects, debt service, capital projects, food services, and community services) account for the remaining fiscal activity.

In addition to the General Fund expenditures and revenues, the other key component of the financial part of this document is General Aid Membership. While other reports utilize enrollment, this section deals with student membership, which is a pupil count adjusted for full-time equivalency (refer to the glossary for a full definition). The practical impact of this difference is that total membership statewide is 823,426, compared to a statewide enrollment of 843,829.

General Fund Revenues

District	General Aid Membership	1993-94 General Fund Revenue (Unaudited Annual Report Data)													
		Local						State			Federal			Overall	
		Property Taxes			Other										
		Dollars	% of Total	$ per Member	Dollars	% of Total	$ per Member	Dollars	% of Total	$ per Member	Dollars	% of Total	$ per Member	Total Dollars	$ per Member
State Totals or Averages	823,426	2,774,070,643	53.60	3,369	132,794,669	2.57	161	2,132,761,797	41.21	2,590	135,638,682	2.62	165	5,175,265,790	6,285

School districts receive revenue from local sources (property taxes and other), the state, and the federal government. Statewide, the property tax is the largest single source of funding, although it may be second to state aid in a few districts. In the other local revenue category are ticket sales, investments, fees, and gifts, and are, generally, a small portion of total revenues.

Property taxes are a function of school district spending and the value of property within a district. Property values are of two kinds, assessed, where the value is determined by a municipal assessor, and equalized. Equalized valuation is determined by multiplying the assessed value by an assessment ratio determined by the Wisconsin Department of Revenue. It is designed to equalize property values despite local assessment practices.

The amount of money to be raised by taxation (the property tax levy as determined by the school board) divided by the equalized value of the property in the district results in the property tax levy rate (often known as the mill rate because the percentage is applied per thousand dollars of value). A property owner's tax is determined by multiplying the mill rate by the property value expressed in thousands of dollars (i.e., $100,000 equals $100).

Statewide, property taxes account for an average of 53.6 percent of revenues, and 2.57 percent is raised through other sources, a total of 56.17 percent. In 1992-93, the average revenue raised through local sources was 56.85 percent (54.3 percent from property taxes and 2.55 from other sources). During the first year of the report, 1991-92, 55.5 percent of all revenues came from local sources.

At the district level, the proportion of revenue raised between property taxes and other sources varies widely. Generally, the higher the property wealth per member, the higher the percentage of property tax revenue to total revenue. Districts with more property wealth per member can raise large amounts of money per student with a low tax rate. And, according to the available data, they (most of these districts are UHS or K-8 only) do just that.

The 13 districts that receive 90 percent or more of their revenues from property taxes all seem to be in areas of Wisconsin where there is a great deal of property wealth. Geneva J4 receives 96.96 percent of its revenue through property taxes. Most of the districts on the list of 13 are in the Lake Geneva area. Three others are in the Lake Country region of Waukesha County, and only one of the 13, Green

Lake, is a K-12 district. Continuing the same resort area theme, the next three districts, all above 89 percent, are in Door County.

At the opposite end of the scale are two districts that get most of their funding from state aid (the Norris residential facility receives only 1.19 percent of its revenue from property taxes) and federal aid (Menominee Indian receives 7.29 percent from property taxes). Also at this end of the spectrum are Mellen and Bowler, which receive 17.98 percent and 18.11 percent from district property taxpayers.

Property taxes per member are highest in most of the same districts where there is considerable property wealth per pupil. There are 17 districts that report revenues from property taxes in excess of $7,000 per member. Linn J4 is at the top end with $10,624, while Nicolet, at $9,098, is second. Linn J6 is third at $8,924, followed by Maple Dale-Indian Hill at $8,623.

At the opposite end of the property tax scale are, in general, low-spending districts with property values that fall below the state's guaranteed valuation per pupil. Aside from Norris and Menominee Indian, a pair of anomalies explained previously, the lowest per-pupil taxing district in Wisconsin is Cadott at $1,119 from property.

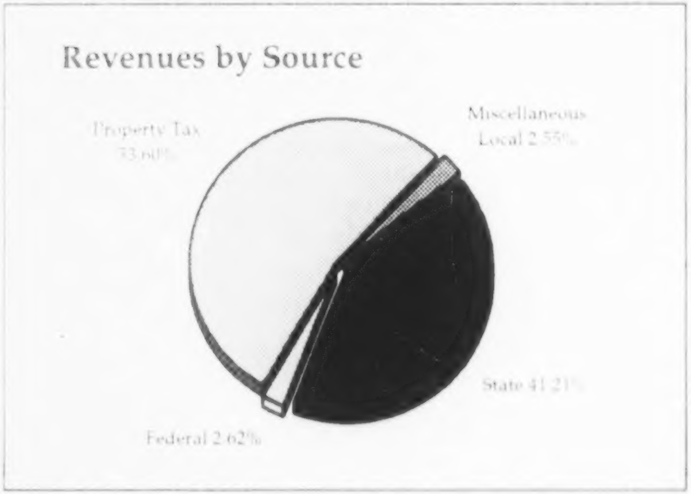

Figure 9: General Fund Revenue

Statewide, revenues from other local sources are only 2.57 percent of the total, which is an average of about $161 per member. There are cases, however, when this source is significant. For example, Norris, the residential school in Waukesha County, has a state-high 27.15 percent of its revenue attributed to other local sources. Loyal, Clayton, and Dodgeland receive between 10 and 14 percent of their revenues from local sources.

Revenues from other sources fall below 1 percent in only four districts. Milwaukee is the anomaly, because state law says that all borrowing and investment for school purposes is to be handled by the city government.

In terms of dollars per member, Norris is at the top of the list with $3,251 per member. Fox Point J2 at $1,047 and Loyal at $919 are second and third. Genoa City J2 with $14 per member and Melrose-Mindoro at $45 per member are at the other end of the scale.

Revenue from state sources is also of two varieties, although this document doesn't distinguish between them. General equalization aid accounts for the bulk of the category. These revenues are intended to finance the general educational program of the district as defined by the school board. Categorical aids, on the other hand, are targeted to specific student populations and instructional or support programs. Examples of categorical aids are handicapped education and transportation aids.

The average Wisconsin school district receives 41.21 percent ($2,590 per member) of its revenue from state sources. Mellen, Glenwood City, Boyceville, Rib Lake, and Prairie Farm all get over 70 percent through state aid. At the other end, all getting less than 2 percent, are Geneva J4, Stone Bank, Lake Country, Swallow, North Lake, and Linn J4—all elementary-only districts.

In terms of dollars per member, Norris gets the most state aid at $7,912 per member, while Menominee Indian is second at $5,749. As has been stated earlier, both are districts serving students with special needs. Mellen receives $5,684 per member and five other districts—Wauzeka-Steuben, Potosi, Glenwood City, South Shore, and Prairie Farm—are closely clustered between $4,500 and $4,800. The same six elementary districts detailed in the previous paragraph are at the other end of the list.

The final revenue source is federal aid. As is miscellaneous local revenue, this is a relatively insignificant item statewide, comprising only 2.62 percent of total revenue ($165 per member). In several districts, notably those with a high proportion of American Indian students, federal funding is critical. Conversely, 73 districts get less than 1 percent of their revenue from this source.

Because this analysis and the tables that follow only reflect Fund 10 (General Fund) resources, the importance of federal aid is understated. For most districts, the majority of their federal aid is paid into Fund 20 (Special Projects Fund) and Fund 50 (Food Service Fund).

In terms of total revenues, the statewide average is $6,285 per member. The top end of the total revenue list (all over $9,000 per member) is occupied by a mix of high-need districts (Norris, Lac du Flambeau #1, Menominee Indian, and Boulder Junction J1) and high-wealth districts (Nicolet, Maple Dale-Indian Hill, Linn J4, Fox Point J2, and Linn J6).

Eleven districts fell below revenues of $5,000 per member for the 1993-94 school district. The lowest were Mishicot at $4,516 per member and Waterford J1 at $4,165.

General Fund Expenditures

1993-94 General Fund Expenditures (Unaudited Annual Report Data)

Licensed Instruction			Support Services			Transportation			Operation/Administration/Other			Overall	
Dollars	% of Total	$ per Member	Dollars	% of Total	$ per Member	Dollars	% of Total	$ per Member	Dollars	% of Total	$ per Member	Total Dollars*	$ per Member
3,290,359,017	**64.44**	**3,996**	**458,406,922**	**8.98**	**557**	**238,190,435**	**4.67**	**289**	**1,118,786,222**	**21.91**	**1,359**	**5,105,742,596**	**6,201**

* Total includes General Fund/Fund 10 expenditures only. Does not include Special Project (Fund 20 series), Debt Service (Fund 30), Food Service (Fund 50), or the net cost of the building fund.

General Fund expenditures have been divided into four categories: licensed instruction, support services, transportation, and operation/administration/other. These groupings do not correspond directly to similar full-time equivalency staffing ratios shown elsewhere in this book. They do, however, give readers a good idea of where money is spent in Wisconsin public school districts.

During the 1993-94 school year, all districts spent $5.1 billion on General Fund expenses, an average of $6,201 per member. The range of expenditures per member, however, varies from $10,745 at Fox Point J2 ($12,145 at the residential facility Norris) to $4,241 at Waterford J1.

For the 1992-93 school year, the average total General Fund expenditure per pupil was $6,025. The comparable figure for 1991-92 was $5,503.

Nineteen school districts, topped by Norris and Fox Point J2, spent over $8,000 per member during the 1993-94 school year. The list included a number of elementary-only districts and two union high school districts (Lakeland and Nicolet). The first six entries are located in southeastern Wisconsin, as are 12 of the total number of 19.

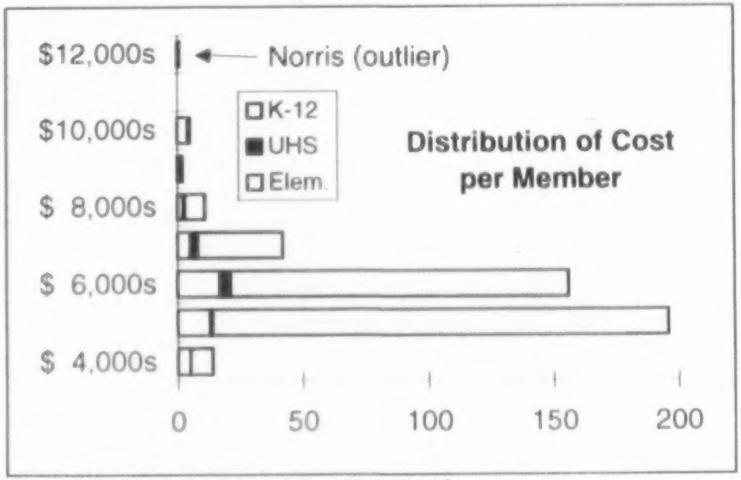

Figure 10: Distribution of Cost Per Member.

Fourteen districts spent below $5,000 per member. The greatest number of school districts in the state spent between $5,000 and $7,000 per member.

An analysis of property wealth and spending levels indicates that, for the 88 percent of the districts in which local property values per member fall below the state guarantee, there is effectively no correlation. In the 12 percent of the districts above the guarantee, property wealth seems to be strongly related to spending.

Wealthy districts spend, on the average, 25 percent more than do equalized districts of the same type (i.e., elementary-only, UHS, and K-12). Although there is no significant correlation between spending and wealth for "wealthy" K-12 districts, these two factors show a pronounced link for UHS and K-8 districts.

The majority of a district's General Fund expenditures occurs within the licensed instruction category. On a statewide basis, it amounted to 64.44 percent of the total and an average of $3,996 per member. In 1992-93, licensed instruction was 64.25 percent of the total and $3,872 per member, while the comparable 1991-92 numbers were 62.8 percent and $3,457.

Licensed instruction includes activities directly associated with interaction between staff (teachers, aides, classroom assistants, and others) and students. These expenditures include salaries and benefits, supplies and equipment, textbooks, and purchased services.

There are six major curriculum areas within this spending category:

- Undifferentiated curriculum instruction takes place when a teacher provides instruction in more than one subject, typically in most elementary and middle schools.
- Regular curriculum instruction takes place when a teacher is responsible for a single curriculum arena, such as in high and junior high schools.
- Vocational curriculum instruction deals with occupational subject matter, such as agriculture, business, medical technology, drafting, and technology education. Experiences in this category are designed to develop knowledge and skills related to the world of work.
- Physical curriculum instruction pertains to personal and public health, safety, physical education, and recreation.
- Special curriculum instruction is designed for pupils with exceptional educational needs, including gifted and talented students and children challenged as a result of physical, social, cultural, cognitive, or emotional conditions.
- Co-curricular activities are school-sponsored, non-credit activities, such as clubs, service organizations, student government, and athletics.

There is not a wide variation in licensed instructional costs as a percentage of total expenditures. In only three districts—Horicon, North Fond du Lac, and Erin #2—does the percentage top 72 percent, and in only four others—Nicolet, Gilmanton, Linn J6, and Fontana J8—does it fall below 55 percent. Ninety percent of the total number of schools districts (387) spend within 5 percentage points of the state average of 64.44 percent.

In terms of dollars per member, there is a large gap even between the top districts in the state: Norris (the residential facility) at $7,676 per member and the elementary-only district, Maple Dale-Indian Hill, at $6,214.

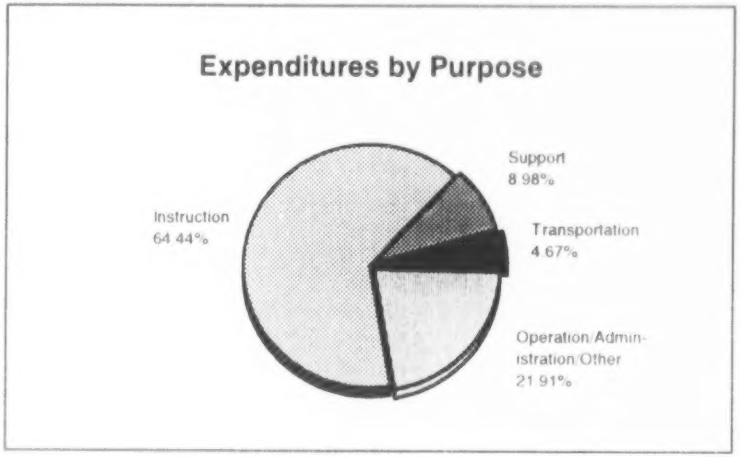

Figure 11: General Fund Expenditures

Administrative, technical, and logistical support to enhance the educational opportunities of students fall under the category of support services. Expenditures are in two areas:

- Services to students, such as social workers, guidance counselors, school health personnel, psychologists, speech pathologists, and audiology specialists.

- Services for staff, through instructional improvement, educational media, and exceptional and vocational education supervision and coordination.

On a statewide basis, only 8.98 percent of General Fund costs were attributed to this category, $557 per member. Nicolet topped the list, devoting 15.33 percent to support services, followed by Norris at 14.4 percent. At the other end of the scale, Dover #1, at 3.17 percent, was one of three elementary-only districts below 4 percent.

On a dollars-per-member basis, Norris, $1,749, and Nicolet, $1,616, flip-flopped. Linn J6 was third at $1,134. The three districts spending the lowest amount for support services were all below $200, with Raymond J1 the lowest at $170.

Not much has changed since the 1992-93 school year, when the percent of General Fund expenditures spent on support services was 8.95, which equaled an average of $539 per member. In the prior year, 8.9 percent or $487 per member went towards this category.

Because transportation costs are so dependent on geography and generally out of the control of the district, they are considered as a separate category in this report. Most often, transportation is a subfunction of business administration.

In Wisconsin, transportation is provided for public and private school students who live two or more miles from the school of attendance or less than two miles if there are hazardous conditions. Transportation can be provided in district-owned vehicles or contracted.

Transportation is provided in four areas: regular, exceptional educational needs (EEN), summer school, and vocational. Districts may also provide transportation for extra-curricular or school-sponsored community activities, although no state aid is provided.

Costs associated with transportation are dependent, to a great extent, on pupil density. Because district size and enrollment vary widely, population density is a critical factor. In other words, districts with a low enrollment spread over a large area will have a high per-pupil cost for transportation.

Statewide, 4.67 percent of expenditures went to transportation. This was an average per-pupil cost of $289. These 1993-94 figures were down slightly from 1992-93, when 4.81 percent of General Fund spending was devoted to transportation ($290 per member). Figures from the 1991-92 school year were 5.1 percent and $284.

Hurley spent the largest percentage of its expenditures on transportation, 11.13 percent. Large, sprawling districts spent the most per pupil on transportation: Boulder Junction J1 $812 per student, Northwood $749, and South Shore at $721. Other than Norris (a residential facility with no transportation costs), the low-spending districts were mainly "urbanized" areas such as Little Chute $49 per member, Whitefish Bay $56, Wauwatosa $57, Shorewood $58, and Saint Francis $75.

Operation/administration/other is the final spending category within General Fund expenditures. It is an all-encompassing area that includes expenses incurred by the school board and district administrators; repairs, remodeling, and facility acquisition; heating, lighting, and ventilation; vehicles; bonding, insurance, and investments; and other fiscal operations.

During the 1993-94 school year, this category averaged 21.91 percent of General Fund spending or $1,359 per member. In the prior year, 21.99 percent ($1,325) was spent, compared to 23.2 percent ($1,275) for the 1991-92 term.

In terms of percentage of General Fund spending, 36.08 percent in Dover #1 was at the high end, and 14.59 percent in Erin #2 was at the low end. Linn J4 spent the most on administration, $3,522, with Fox Point J2 and Linn J6 both over $3,200, while Campbellsport was low at $821 per member.

Meeting Every Need

The Wisconsin Constitution says that education is the right of all children in the state. Because everyone comes to their educational experience with different abilities and needs, this state has historically been a national leader in providing an appropriate learning environment for students, no matter what their special circumstances.

The Department of Public Instruction operates residential facilities to provide special educational services to two unique student populations, the School for the Deaf (WSD) in Delavan and the School for the Visually Handicapped (WSVH) in Janesville. These facilities provide a portion of what state and federal law describe as the "full continuum of alternative placements" due all children and are extensions of the program offered in the state's 427 districts.

Unique Needs Met

WSD's mission is to meet the unique needs of hearing disabled children who cannot be appropriately served in their home school districts. The facility deals with all dimensions of the children's lives through preschool, academic, multiple handicapped, social living, and vocational education services.

In addition to adapting the standard curriculum to the needs of deaf and hard-of-hearing students, WSD offers special programs in communications development (sign, speech, and written expression) and cultural awareness of self and the deaf community.

The WSD community extends far beyond the facility. Students are urged to interact, on an academic and social level, with the students and staff of Delavan-area schools. In turn, hearing students are encouraged to participate in events at WSD. A vigorous , after-school activity program encompasses athletic competition and community participation.

WSD services extend far beyond the normal school year, too, with summer school for remedial and diagnostic purposes. The Delavan campus also serves as a teacher-training site.

The mission at WSVH is also to meet the unique needs that cannot be appropriately addressed at the local school district level. Those needs are met within a framework of well-defined courses for visually handicapped students of all ages and competency levels. The curriculum is divided into six areas: academic, vocational, music, personal management, physical education, and recreation.

The students, academic and non-academic programs, and staff of the WSVH are also integrated with the wider community, in this case, Janesville. Summer school opportunities are available especially for adults who have recently lost their sight. This program emphasizes personal management skills, interpersonal relationships, communication, and vocational education.

Students Are Challenged

Special educational services and a challenging regular educational curriculum are offered to students at both state-run facilities. For that reason, accountability is as important to the staff and administration of the DPI and these residential schools as it is to those in Wisconsin's 427 "regular" school districts. Unless otherwise noted, therefore, the information in the School Performance Report stands as a measure of the progress being made by WSVH and WSD.

In the Student Performance Indicator tables of this book, no information is displayed for either facility for the Third Grade Reading Test or the Eighth-Grade or Tenth-Grade Knowledge and Concepts Examinations. Neither school administers these tests because no allowances are made for handicapping conditions; both facilities, however, rigorously test all areas of academic achievement.

According to information received by DPI, no students at these two schools took the ACT. The company that administers the test did say, however, that modified tests are available for students with vision and hearing problems. Although the University of Wisconsin System requires the ACT as an entrance requirement, it does make allowances for handicapping conditions.

Similarly, no Advanced Placement Test results are listed for WSD or WSVH. Again, the test company, in this case The College Board, said that accommodations are made for handicapped students.

Neither WSVH nor WSD reported any students taking advanced coursework or foreign languages. Both schools recognize their mission includes offering such opportunities and are exploring the possibility of offering courses in their own classrooms or in cooperation with neighboring public school districts.

Because of the unique nature of the student body at both institutions, we should also take a special look at the tables on fiscal and staffing information.

It is essential that the pupil/staff ratio at both facilities be small. Individual attention is critical to a successful educational experience. For that reason, WSD and WSVH show ratios of 1.29 and 0.86 pupils per staffer, respectively, while the staff average statewide is 9.4

Additionally, because the citizens of Wisconsin understand and appreciate the singular nature of both schools, their budgets are part of the DPI's biennial budget. Funding of the residential facilities is from the state's general fund, and expenditures, although sometimes comparable, vary from those of "regular" districts because of the disabling condition of the students and mission of the facilities.

Non-Residential Special Schools

In the same spirit of universal education that makes the School for the Deaf and School for the Visually Handicapped among the best in the nation, Wisconsin provides alternative placements for other young people with special needs. For some children that means educational programs in their home districts, while for others those opportunities are administered by cooperative educational service agencies (CESAs) or county handicapped children's education boards. During the 1993-94 school year, 136 nonresidential special education programs were in operation. Services were offered to 996 children:

- 14 units with 125 moderately/mildly/borderline cognitively disabled students.
- 55 units with 420 severe cognitively disabled students.
- 1 unit with 2 learning disabled students.
- 65 units with 443 emotionally disturbed students.
- 1 unit with 6 physically handicapped/other health-impaired students.

Six of the 32 programs considered in this section are operated by school districts, and the children in them (298) are reflected in the School Performance Report.

Other facilities are of two types:

- Operated by districts but children aren't included in the SPR report. There are 14 programs in this group serving 219 children.
- Operated by county handicapped children's education boards or CESAs. Twelve programs serve 479 students in this group.

As accountability becomes more and more important, the School Performance Report must do a better job of telling the story of the educational experiences of the children in these programs. While they are fine facilities, it is necessary to detail their "special stories" to guarantee that all students in Wisconsin have access to the education that is their constitutional right.

Charter Schools

In 1993, the Wisconsin Legislature, in Act 16, authorized local school boards to contract for the operation of charter schools on behalf of the district. The original law allowed charters to be issued by a maximum of 10 districts.

Charter schools are not required to meet most of the rules and regulations applicable to other schools except those affecting the licensure of teachers and administration of the Third Grade Reading Test and the Eighth and Tenth Grade Knowledge and Concepts Examinations.

Working under these few state requirements, charter schools have the opportunity for creative, innovative educational programming. In many cases, the charter school is aimed at helping a group or groups of students whose needs may not have been adequately addressed in the past. It is a new and developing concept in Wisconsin, and the state is trying to determine who is being served and the results of that service.

As of the writing of this document, all 10 slots were filled, but only three districts had charter facilities in operation. Nine other districts were on a waiting list. Although all had different ideas, there were common characteristics of a "Wisconsin charter school." The school board actually becomes a purchaser of educational services rather than a provider, and new opportunities are opened up for relationships with business, industry, and other community partners.

In most charter school districts, site-based management and shared decision-making are taken to higher levels of implementation as the school, not the district, becomes the decision point. Additionally, evaluation is normally based on achievement of important outcomes, results-based learning, and performance rather than process. Finally, charter facilities establish a separate administrative structure that puts a premium on extensive parental and community involvement.

The first three charter schools in Wisconsin were operated in the districts of Beaver Dam, Madison, and Stevens Point. Charters are being developed in Milwaukee, Verona, Lake Mills, Middleton-Cross Plains, Weyauwega-Fremont, Racine, and DeForest. The waiting list includes Beloit, Hayward, Appleton, Kewaskum, LaCrosse, Plymouth, Oshkosh, Menasha, and Sun Prairie.

At the present time, charter schools and information about their students and operation are not dealt with separately in the School Performance Report. Statutes do, however, cover charter school students. Therefore, it is the opinion of the DPI that, eventually, performance, student, and institutional information will have to be readily available for accountability purposes.

Errata

The information in the statewide School Performance Report should be the same as it is in local district reports. For a variety of different reasons, however, there are some discrepancies.

Discrepancies of which the Department of Public Instruction is aware are explained in this section of the document.

- Madison Metropolitan School District—The local School Performance Report distributed in the Madison Metropolitan School District reports different information in two tables, Staffing Ratios and Graduation Rate.

The discrepancy in the Staffing Ratio table came to light when the district realized it had under-reported personnel in all three categories. Correct figures are displayed in the table below. Incorrect figures will be found in Appendix B, Opportunity-to-Learn Indicator Tables.

District Staffing Ratios 1993-94

Staff type	F.T.E.	% of Total	Pupil/Staff %	State %
Licensed Instruction	2047.95	66.1%	11.9	14.0
Administrative	97.0	3.1%	252.1	268.1
Aides/Support/Other	954.27	30.8%	25.6	32.1
DISTRICT TOTALS	3099.22	100.0%	7.9	9.4

Although the numbers of graduates listed at the four Madison high schools listed in the district report vary somewhat from those listed in this document, the large difference in the graduation rates seems to be attributable to changes made in the 12th grade enrollment. In other words, the district changed the denominator used in the calculation of the graduation rate. The correct numbers are used in the following chart. Incorrect figures will be found in Appendix A, Student Performance Indicator Tables.

Graduation Rate Summary by School 1993-94

School	Enrollment	Graduates	Graduation %
East High	333	316	94.9%
La Follette High	308	288	93.5%
Memorial High	355	339	95.5%
West High	422	389	92.2%
DISTRICT TOTAL	1,418	1,332	93.7%
State Total	53,625	48,371	90.2%

- Monroe School District—A data entry error at Monroe High School resulted in a report that accounted for attendance by the quarter rather than annually. The corrected information (with erroneous numbers in parentheses) is: Possible Days of Attendance 137,897.0 (37,693.0); Actual Days of Attendance 130,717.0 (35,672.0); and Attendance Rate 94.79 percent (94.64 percent).

This correction also changes the report that summarizes information for the entire district: Possible Days of Attendance 458,934.0 (358,730.0); Actual Days of Attendance 438,580.5 (343,53.5); and Attendance Rate 95.57 percent (95.76 percent).

- School District of West Allis—The School District of West Allis reported, after compilation of the School Performance Report information, that it had submitted incorrect numbers in four areas. The corrected numbers are included in the tables that follow. For comparison to the data originally reported; see Appendix A for graduation and postgraduation information and Appendix B for dropouts and expulsions.

In addition to those problems corrected in the charts that follow, the DPI discovered an error in the reporting of Advanced Placement (AP) Test information for the West Allis School District. Although no results are shown in the statewide summary, students did take the tests. There were 2,837 students eligible to take examinations (enrollment in grades 9-12). Fifty-nine students took 62 AP exams.

Thirty-nine exams, or 62.9 percent of those taken, were scored as passing (compared to 65.84 percent statewide).

1993-94 Graduation Rate

School	Enrollment	Graduates	Graduation %
Central High	278	247	88.85%
Hale High School	266	242	90.98%
DISTRICT TOTAL	548*	489	89.92%
State Total	53,625	48,371	90.2%

* 4 students are enrolled in an alternative program in another facility.

---

* Total includes General Fund/Fund 10 expenditures only. Does not include Special Project (Fund 20 series), Debt Service (Fund 30), Food Service (Fund 50), or the net cost of the building fund.

Glossary

ACT—See American College Test.(PRIVATE)

Actual Days of Attendance—Number of days of face-to-face instructional contact that occurred. The smallest unit of attendance is one-half day.

Administrative Staff—One of three categories of school district employees, including district administrators, assistant district administrators, business managers, directors of instruction/supervisors, principals, assistant principals, supervisors of special education (A and B), directors of human relations/multicultural education/equity, directors of special education and pupil services, and library media supervisors. (Also see Aids/Support/Other and Licensed Instruction.)

Advanced Coursework—Three types of courses: College Advanced Placement Program (CAPP); Advanced Placement (AP) program; and those considered to be advanced by the Wisconsin Department of Public Instruction. For purposes of the School Performance Report, all foreign languages are included in this section. Advanced Coursework information reported from students in grades nine through 12 only.

Advanced Coursework, Other—Advanced coursework not in science, mathematics, or foreign language, including 200-005 Advanced Placement (AP) English; 200-030 AP History; 200-031 AP Government and Politics; 200-032 AP Economics; 200-033 AP Psychology; 200-040 AP Art; 200-045 AP Music; 200-999 AP Other; 205-005 College Advanced Placement Program (CAPP) English/Language Arts; 205-030 CAPP Social Science; 205-040 CAPP Art; 205-045 CAPP Music; and 205-999 Other CAPP.

Advanced Coursework, Mathematics—Advanced coursework in mathematics, including 124-130 Technical Mathematics; 124-330 Calculus and Analytic Geometry; 124-700 Statistics/Probability; 124-800 Trigonometry; 200-020 Advanced Placement mathematics; and 205-020 College Advanced Placement Program mathematics.

Advanced Placement Courses—Advanced coursework offered through The College Board of Princeton, New Jersey.

Advanced Placement (AP) Test—Testing program recognized by the University of Wisconsin System and many other colleges and universities as a means to obtain college credit while still in high school. Information is for 9th through 12th graders only.

Advanced Coursework Science—Advanced coursework in science, including 126-202 Advanced Biology (second year); 126-312 Advanced Chemistry (second year); 126-322 Advanced Physics (second year); 126-402 Advanced Earth Science (second year); 126-410 Astronomy; 126-450 Aviation; 126-490 Biotechnology; 180-02 Advanced Computer Science; 200-010 Advanced Placement (AP) Biology; 200-011 AP Chemistry; 200-012 AP Physics; 200-021 AP Computer Science; 205-010 College Advanced Placement Program (CAPP) Biology; 205-011 CAPP Chemistry; 205-012 CAPP Physics; 205-019 CAPP Other Science; and 205-021 CAPP Computer Science.

AGCS—See Average Grand Composite Score.

Aides/Support/Other Staff—One of three categories of school district employees, including bus drivers, clerical staff, plant operation personnel, plant maintenance personnel, cafeteria workers, athletic coaches, educational interpreters-hearing impaired, advisors to student clubs, administrative assistants, directors of transportation, directors of athletics, directors of public relations, recreation department staff, research personnel, program aides, other support staff, other professional staff in non-educational roles. (See also Licensed Instruction and Administrative Staff.)

American College Test—Test designed by the American College Testing Corporation of Iowa City, Iowa, to measure knowledge, understanding, and skills acquired during the K-12 educational experience in English, mathematics, reading, and science reasoning. The ACT is required for admission to the University of Wisconsin System and many other colleges and universities. Information is for members of the graduating class who took the test as juniors or seniors. Only students who completed the entire test are represented in this publication.

AP—See Advanced Placement test or Advanced Placement courses.

Attendance—Face-to-face instructional contact (either possible or actual) between a student and teacher.

Attendance Rate—Actual days of attendance divided by possible days of attendance and expressed as a percentage.

Average Grand Composite Score (AGCS)—A score designed by the Department of Public Instruction to provide general indication of student achievement on the Eighth and Tenth Grade Knowledge and Concepts Examinations. The AGCS is based on tests results of students who finished all of the academic tests in multiple choice, writing essay, and short answer. Maximum possible AGCS is 246.

Average Student Score—Sum of scores received on portions of the ACT (English, mathematics, reading, and science reasoning) divided by the number of students tested. (Also see Composite Student Score.)

B-3 Program—See Birth to Three.

Birth through Age 2—See Birth to Three.

Birth to Three—Legislative name of birth through age 2 program. Comprehensive, multidisciplinary, and interagency program to serve children, birth to age 3, who are significantly developmentally delayed or diagnosed with a physical or mental condition which is likely to result in a developmental delay. Administered at the state level by the Department of Health and Social Services, with county boards designating lead agencies at the local level.

Chapter 1 Preschool—A developmentally appropriate, child-centered program that is made available to 3- and 4-year-old children living in high-poverty school attendance areas who can benefit from instruction in a school or home educational setting. The program is funded by the federal government but administered by the local school district.

Classes Offered—Total number of advanced coursework classes offered, whether or not students are enrolled.

College Advanced Placement Program—Advanced, college-level courses offered for college credit in conjunction with a local college or university.

Combined Rate Percentage—Students enrolled in advanced coursework divided by the third Friday enrollment in grades 9 through 12.

Composite Student Score—On the ACT, the weighted average of the four scores received in English, mathematics, reading, and science reasoning. The Average Composite Student Score is the sum of the composite student scores divided by the number of students tested.

Credits Required to Graduate—Wisconsin law establishes 13 credits as the minimum for graduation, including four credits of English, three of social studies, two credits each of mathematics and science, 1.5 of physical education, and 0.5 of health. The Department of Public Instruction recommends an additional 8.5 credits in elective courses.

District Staffing Ratios—The number of students enrolled in a district divided by the number of FTE staff members (licensed instruction, administrative, aides/support/other) employed by a district.

Dollars—

- For the general fund revenue, those resources derived from local, state, or federal sources.
- For the general fund expenditures, those expenditures for licensed instruction, support services, transportation, or operation/administration/other.

Dollars Per Member—For revenues and expenditures, dollars divided by general aid membership.

Dropout—A student in grades 9 through 12 who is not attending school and should be, and who hasn't received a diploma or been granted a diploma for completion of a state- or district-approved educational program. A student is not considered a dropout if he or she meets one of the following exclusions: transfer, excused absence, imprisonment, hospitalization, or death.

Dropouts—The number of ninth through 12 graders defined as dropouts on the final day of the school year is the number of dropouts in a district/school. The dropout rate is the number of dropouts divided by the third Friday enrollment in grades 9 through 12 expressed as a percentage.

EEN—See Exceptional Educational Needs.

EEN (3-5)—Program to address the exceptional educational needs (as defined in s.115.76, Wis. Stats.) of children ages 3 through 5.

Eighth and Tenth Grade Knowledge and Concept Examinations— Examinations administered for the first time during the 1993-94 school year to eighth and 10th graders as part of the Wisconsin Student Assessment System. They consist of multiple-choice questions (reading, mathematics, language, social science, and science), short-answer questions (reading, mathematics, science, and social science), and two writing-prompts. Scores for the multiple-choice and writing tests are reported as national percentile ranks, which is the relative standing of students compared to others in the same grade in the reference group (nationally). The percentile rank corresponding to a given score indicates the percentage of students in the same grade obtaining scores equal to or less than that score. Raw scores are reported for the short-answer tests. Each subject area (i.e., reading, math, science, and social science) has a maximum possible score of nine.

Enrollment—See Third Friday Enrollment, General Aid Membership, Students Enrolled, and Enrolled at Test Time.

Enrolled at Test Time—Enrollment at the time the Third Grade Reading Test, Eighth Grade Knowledge and Concepts Examinations, or Tenth Grade Knowledge and Concepts Examinations are administered.

Exams Passed—Advanced Placement exams with scores of 3, 4, or 5. The College Board of Princeton, New Jersey, offers AP exams and has determined a score of 3 or more is passing.

Exams Taken—Total number of Advanced Placement tests administered, including multiple tests taken by the same student.

Exceptional Educational Needs—According to s.115.76, Wis. Stats., mental, physical, emotional, or learning disabilities which, if the full potential of a child is to be realized, require educational services to supplement or replace regular education. Services can include classroom instruction, instruction in physical education, and instruction at home or in hospitals or other institutions as needed.

Expulsion—Sanction imposed on a student by formal school board action for purposes of discipline, which prohibits pupil from attending school. Expulsion action is described in ss.120.13(1)(c) and 119.25, Wis. Stats. Expelled pupils are counted only once (as number of pupils expelled) and the percent of pupils expelled is the number of pupils expelled divided by the third Friday enrollment. The expulsion rate is the number of days lost to expulsion (i.e., number of days expelled) divided by the possible days of attendance.

Extra-/Co-curricular Activities—School-sanctioned groups or events to broaden, develop, and enhance school experience in areas of academics, athletics, and music. Reported for grades 6-12. The group or event is not offered for credit or grade.

Federal Revenue—School district resources from federally collected sources paid as categorical aid.

Foreign Language—For purposes of the School Performance Report, all foreign language courses and enrollment are counted in the Advanced Coursework section.

Full-Time Equivalency (FTE)—A person's employment in a school district expressed as a ratio of time spent on the job divided by a standard work week. For example, a kindergarten teacher with only morning classes would be 0.5 FTE.

General Aid Membership—School or district resident enrollment adjusted for student full-time equivalency (for example, 3-year-old early childhood student counts 0.5 FTE).

General Fund Expenditures—Spending (also known as Fund 10) in four categories: licensed instruction, support services, transportation, and operation/administration/other. Expenditures not included are Special Project Fund (Fund 20), Debt Service Fund (Fund 30), Building Fund (Fund 40), and Food Service Fund (Fund 50).

General Fund Revenues—Resources, used to finance General Fund operations of a school district, from three sources: local, state, and federal. (See also Local Revenue, State Revenue, and Federal Revenue.)

Graduates—Students who complete the prescribed course of study established by a local school district. Districts can also issue graduation diplomas for successful completion of a school-sponsored general education development (GED) program or attainment of the high school equivalency diploma (HSED).

Graduation Rate—Number of graduates in the spring of a school year divided by number of 12th graders enrolled on the third Friday in September of the same school year and expressed as a percentage.

Graduation Requirements—Wisconsin law establishes 13 credits as the minimum for graduation, including four credits of English, three of social studies, two credits each of mathematics and science, 1.5 of physical education, and 0.5 credits of health. In

BEST COPY AVAILABLE

addition, the Department of Public Instruction recommends a minimum of 8.5 elective credits in *vocational education, foreign language*, fine arts, and other electives.

Habitual Truant—A student who is absent from school without an acceptable excuse [s.118.16(4) and s.118.15] for part or all of five or more days out of 10 consecutive days on which school is held during a semester or part or all of 10 or more days on which school is held during a school semester. The habitual truancy rate is the number of habitual truants divided by the third Friday enrollment and expressed as a percentage.

Head Start—A comprehensive education program for children ages 3-5 whose families meet federal poverty guidelines. This program includes education, health and developmental screening and services, nutrition and mental health services, and social, education, and support services for adults.

LES—Limited English Speaking Student. See Limited English Proficient Student.

Licensed Instruction—

- Expenditure category that includes expenses for undifferentiated, regular, vocational, physical, special, and co-curricular instruction.
- One of three categories of school district employees, including teachers, subject coordinators, reading specialists, department heads, teachers in charge, school social workers, guidance counselors, school psychologists, physical therapists (and assistants), occupational therapists (and assistants), program coordinators, school nurses, librarians, library media specialists, educational audiologists, audiovisual/technology specialists, and speech/language pathologists.

Limited English Proficient Student or LEP— According to s.115.97, Wis. Stats., a pupil whose ability to use the English language is limited and who has difficulty in performing ordinary class work in English because of the use of a non-English language in his/her family or non-school surroundings.

Local Revenue—School district resources from either property taxes or other local sources (fees, interest payments, insurance refunds, etc.).

Normative Data—Scores (data) for the Eighth and Tenth Grade Knowledge and Concepts Examinations are shown in the School Performance Report as a percentage of the norm or standard, which is a perfect score. For example, a score of 88 percent means *88 percent of a perfect score.*

Number of 12th Graders—Third Friday enrollment of 12th graders.

Offerings—Groups, events, or activities used in both extra-/co-curricular and school-sponsored activities.

Operation/Administration/Other—Total of expenditures for general, school building, and business administration; central services; insurance and judgments; other support services; and non-program transactions.

Participants—An unduplicated count of students taking part in an extra-/co-curricular category (Academics, Athletics, or Music) or a school-sponsored category (Voluntary or Required).

Participation Rate—Number of participants divided by the third Friday enrollment, as used in both extra-/co-curricular and school-sponsored activities.

Percent Above Performance Standard—Percent of students taking the Third Grade Reading Test who scored above the performance standard (that is, from 28 or more of a possible 40).

Percent Below Performance Standard—Percent of students taking the Third Grade Reading Test who scored below the performance standard (that is, 21 or less of a possible 21).

Percent Enrollment—Students enrolled in an advanced course divided by the 9th- through 12th-grade third Friday enrollment.

Percent Inconclusive—Percent of students taking the Third Grade Reading Test whose score relative to the performance standard was inconclusive (that is, 22 through 27 of a possible 40).

Percent of Students Tested—

- For the Third Grade Reading Test (TGRT), the number of students tested divided by third-grade enrollment at test time.
- For the American College Test (ACT), the number of students tested divided by 12th-grade third Friday enrollment.

Percent of Total—

- For the general fund revenue, dollars (resources in a specific category) divided by total revenues (all general fund resources).
- For the general fund expenditures, dollars (expenditures in a specific category) divided by total expenditures (sum of general fund expenditures).

Percent Exams Passed—Number of Advanced Placement tests passed divided by the number of exams taken.

Possible Days of Attendance—Number of days of face-to-face instructional contact that could occur in the school calendar. The smallest unit of attendance is one-half day.

Postgraduation Follow-up—Intentions of 12th graders when surveyed prior to graduation. The percent selecting each option is determined by dividing the number naming that option by the total number of graduates. Options included job training, Voc/Tech college, 4-year college/university, military, employment, and seek employment. Miscellaneous includes other, undecided, and no response.

Pupil/Staff Ratio—Third Friday in September student enrollment divided by staff full-time equivalency (licensed instructional, administrative, aides/support/other, or the sum of all three) and expressed as a percentage.

Retentions—Students who, by local district policy, must either repeat a grade or need additional time to complete the prescribed program are considered retentions. The number of retentions are reported for all grades except Birth through Age 2, EEN for ages three through five, Chapter 1 Preschool, Head Start, and 4-Year-Old Kindergarten. The number of retentions divided by the third Friday enrollment in the affected grades (expressed as a percentage) is the retention rate.

Required Community Activity—See School-Sponsored Community Activity.

School-Sponsored Community Activities—School-sponsored or supervised events that emphasize service to and involvement with the community. They may be:

- Required: Activity is mandatory or a grade or credit for graduation is given.
- Voluntary: Activity is not mandatory and no grade or credit for graduation is given.

State Revenue—School district resources from state-collected sources, such as income or sales taxes, paid as general or categorical aid.

Students Taking Exams—Number of students taking one or more Advanced Placement exams, (counted only once).

Students Tested—

- For the Third Grade Reading Test (TGRT), the number of students taking the test. Excluded are those absent during the testing period or excused due to exceptional educational needs (EEN) or limited English proficiency (LEP).
- For the American College Test (ACT), the number of members of a graduating class who took the test either as juniors or seniors. A student taking the test more than once is counted only once, and the most recent score is used. Only students who completed the entire test are included.

Support Services—Total of expenditures for pupil services (such as psychology, social work, and nursing) and instructional services (such as curriculum development and inservice training).

Suspensions, Out-of-School—Out-of-school suspensions are absences from school imposed by the school board for disciplinary reasons. Suspended students are counted only once (number of pupils suspended), and the percent of pupils suspended is the number of pupils suspended divided by the third Friday enrollment. The number of suspensions is the total number of suspensions, regardless of the number of students suspended, and the number of days suspended is the number of days lost to suspension. The suspension rate is the number of days lost to suspension divided by the possible days of attendance.

TGRT—See Third Grade Reading Test.

Third Friday Enrollment—Number of students eligible to attend class on the third Friday in September, whether or not those students are in attendance.

Third Grade Reading Test—Statewide test (mandated by s.121.02(1)(r), Wis. Stats.) to be administered to 3rd graders, including those attending charter schools.

Total Dollars—

- For the general fund revenue, the amount of revenue raised from local, state and federal sources.
- For the general fund expenditures, the amount of general fund expenditures (total of licensed instruction, support services, transportation, and operation/administration/other).

Transportation—Total expenditures for pupil transportation.

Truant—A student absent from school for all or part of one or more days during the school has not been notified of the legal cause of the absence by the student's parent or guardian. A truant is also a student whose intermittent attendance circumvents the intent of s.115.18, Wis. Stats. School Attendance.

Voluntary Community Activity—See School-Sponsored Community Activity.
